

# Biliousness

Is caused by torpid liver, which prevents digestion and permits food to ferment and putrify in the stomach. Then follow dizziness, headache, constipation, etc. Sufferers should take **Ayer's Sarsaparilla**. The only pills that cure.

## TOPICS OF THE WEEK

HERE IS THE NEWS IN SHORT ORDER.

Things from all Parts of the Globe, Condensed and Arranged for Busy Readers.

ADAMANT.

Boisvein, Man., is building a \$3,000 rink.

Thomas Duley was killed at Camp Palmer while on duty.

Mr. Thomas Sullivan, of Hamilton, was killed by a shunting engine on the T. H. & B.

Rev. Canon Racicot has authorized the priests of the Archdiocese of Montreal to pray for rain.

The Quebec Legislature is summoned to meet for the despatch of business on the 23rd prox.

The water of the Ottawa river is very low, and there are many cases of typhoid fever at Ottawa.

Ball wheat in the neighborhood of Mitchell has been much hurt by the continued dry weather.

Fenelon Falls Chemical Works have given a contract for 3,500 cords of hardwood at \$2 per cord.

Destructive bush fires on the Kingsmere mountains, near Ottawa, are threatening the village of Kingsmere.

The amount of property exempt from municipal taxation at Ottawa is estimated at over \$15,000,000.

Justice stamps will soon be at a premium, as the Post-Office Department supply has been exhausted.

Mr. J. D. Moore, of St. Mary's, has recently shipped four cars of 500 cases of eggs to Glasgow, Scotland.

Thomas Rogers, formerly of St. Thomas, who was reported dead at Dillon, Montana, is alive and well.

The bye-elections in Temiskaming, Rimouski, and Drummond, and Arthurs are set for November 15.

Provincial Dairy Inspector Macdonald says Manitoba's output of butter will exceed that of last year by \$100,000.

Bush fires on the Kingsmere mountains, near Ottawa, are threatening the village of Kingsmere.

The Government tug St. James, with Hon. Mr. Tarte and a party on board, collided with a sailing vessel near Champlain.

A petition is being circulated at Nanapan for the retention of Mr. Balnes as manager of the Dominion Bank at that place.

Mr. A. Pepler, agent of the Dominion Bank at Guelph, will be transferred to Nanapan, Mr. Stanton, of Toronto, succeeding him.

Wm. McKay, the Tilbury farm hand, who attempted to assault a thirteen-year-old girl, was sentenced to six months in the Central.

There is a proposition before the Government for the purchase of the Rathburn Lumber Company for the manufacture of wood alcohol in Canada.

Emerson Astin set six bear traps near Lake Umbagog, and a moose was caught in the black bear in every trap. This is the hunter's own story.

At the anniversary service of the Charles Street Methodist church, Ingersoll, about \$2,500 was raised by collection and subscription.

No work is being done on the oil and gas well, and Tilbury's chance of securing the oil and gas is not now considered very bright.

Peterboro is on the lookout for manufacturers, and a Council committee is looking with a concern that will give employment to the unemployed.

Geo. McIntyre and W. J. Clement, of Brandon, killed a garter snake which measured about 16 feet in length, at Lake Umbagog.

In the Supreme Court at Ottawa judgment was rendered in the City of Toronto v. the Toronto Railway, allowing the motion and quashing the appeal.

Mr. S. M. Sovereign, of Simcoe, had an adventure with a moose, but he was not the usual order, he was \$50 ahead when the swinder got away.

John Hamilton, Adam London and James Hamilton, of Toronto, were tried at Sherbrooke on a charge of perjury. Thomas Gallagher was discharged.

Ottawa Board of Trade wants legislation to give the Board of Trade, similar to Toronto's, composed of the Mayor and three aldermen chosen by the Council.

A Glasgow prisoner in the London Jail on a charge of assaulting Miss Irvine, a school girl, near Newbury, escaped from the prison by climbing over the wall.

During a revival meeting in Richmond, Va., the Rev. T. H. Leavitt prayed that two women who laughed at his preaching might die immediately and go to hell.

New Carleton, Que., was on fire on Saturday, it being the occasion of laying the first rail on the Atlantic and Lake Superior railway.

Judge Wetmore says that crime is not frequent in the Northwest Territories, owing to the splendid discipline exercised by the N.W.M.P. It would be a mistake to reduce the force.

Mrs. John A. Manly, wife of the Mayor of Grand Forks, B. C., publicly whipped Charles Cummings, the town ship agent. She claims Cummings tried to seduce her good name.

The pipe line being laid on the oil field of Manitoba, the Canadian Oil Works in Sarnia is completed, and crude oil is being pumped through the pipes to Sarnia.

An enormous turgeon was caught in the bay at Midland on Saturday last. It weighed 110 pounds, and was found to have no marked improvement, took three bottles of a Homopoeitic remedy now being extensively advertised which did not relieve him in the least. I was beginning to give up all hope when I was informed by chance I mentioned the case to a friend who strongly advised me to give Parolone a trial.

I did so, with the result that when my boy laid taken only half a bottle he was able to get on his bicycle and ride like any other boy around the city.

I certainly feel that I cannot say too much in praise of your medicine, and shall do so I can know its value to others. Yours very sincerely,

(Signed) REUBEN CLARK.

## DEATH OF LOUIS XV.

The King Died of the Most Virulent Form of Smallpox.

"Marie Antoinette as Dauphine" is the title of an article by Miss Anna L. Black in the Century. Miss Black says: On April 28, 1774, Louis XV. left the first symptoms of the smallpox which was his favorite summer palace adjoining Versailles, to which he returned immediately. During the night of the 30th the characteristic eruption of smallpox appeared in its worst form.

With admirable devotedness the king's doctors continued to his bedside, notwithstanding the dreadful danger of contagion, and remained there day and night, but his wife, Marie Antoinette, had asked admittance to his room, but, for very evident reasons, neither the king nor his wife were permitted to breathe an atmosphere so dangerous that more than 60 persons took the smallpox before having crossed the gallery before the door of the king's room. M. de Leterriere took the disease fatally, merely through having opened the door to look at the king for two minutes.

Regardless of danger, the archbishop of Paris came to Versailles. He was anxious to secure the means of repentance and a Christian death to the wretched sinner, but, at the same time, he declared that he would not be the last sacrament of the church to be administered to the dying man unless M. de Barry was previously dismissed from the palace. On the 4th of May the Duchess d'Aiguillon took her to a country house belonging to the Duc d'Aiguillon. There was consequently no further obstacle to the administration of the last rites of the church. Shortly afterward his condition became more alarming and it was evident that the end was at hand.

The courtiers crowded in the large room called the "Salle de l'Oratoire," where the king was lying, to see the last moments of the king. The king was lying on his back, his head resting on a pillow, his eyes closed, his hands clasped in prayer. The king was lying on his back, his head resting on a pillow, his eyes closed, his hands clasped in prayer.

## Is Your Heart Strong?

Or have you palpitation, throbbing or irregular beating, dizziness, short breath, smothering or choking sensation, pain in the breast or heart. If so, your heart is affected and will in turn affect your nerves, causing nervousness, sleeplessness, morbid anxious feeling, debility.

## Milburn's Heart and Nerve Pills

Cure all these complaints by regulating the heart's action and building up the nervous and muscular system to perfect health and strength. Price 60c. per box or 6 boxes for \$2.50. At all druggists.

## Steamer "VARUNA."

Leave Trenton .....	7.10 a. m.
" Belleville .....	7.30 "
" Deseronto .....	10.20 "
And all intermediate points.	
Arrive g. Picton .....	12.00 noon.
Leave Picton .....	1.00 p. m.
" Deseronto .....	2.30 "
" Belleville .....	4.00 "
" Trenton .....	6.00 "

Connecting at Picton with Stage for Sand Banks; at Belleville for Ivanhoe; at Trenton with steamer Iona for Oswego and Syracuse; N. Y., and C. O. R. train from Marmora.

## Deseronto Navigation Co'y (Ltd.)

SUMMER TIME TABLE.  
Taking Effect June 14th, 1897.

Steamers will run as follows daily except Sundays—

## Steamer "ELLA ROSS,"

(D. B. Christie, Master.)

Picton to Deseronto, Belleville & Trenton.

Leave Picton .....	6.00 a. m.

Subject to change.

## CHEAP, BUT COMMODIOUS.

A Henney that Will House a Large Number of Fowls.  
Those who wish a plan for a cheap and commodious henney that will if necessary accommodate a large number of fowls will be interested in one just completed by a practical poultryman. The drawing of the building shows the north and west sides. The building is 16 by 20 feet, 16 feet high to roof peak. Fig. 2 represents the inside of the building as follows: C, roosting and general room; B, eggroom, feedroom, etc.; A, A, A, nests. In the recess there are three rows of nests, one above the other; 5, door opening from outside building; 6, door opening from feedroom to recess, nest boxes and roosting room. Fig. 3, nest boxes, 13 by 20 inches. These boxes are all movable for arranging to suit circumstances. By raising a board,

A CONVENIENT HENNEY.

hinged, one can readily examine the nests from the feed or egg room. Should a hen wish to sit, take out one of the nest boxes, turn it end for end, thereby placing the end that is closed up in the roosting room, which prevents the other hens from bothering or annoying her. It is so arranged that the sitting hen can go out in a little yard, scratch and dust without any inconvenience or annoyance from the others. The egg or feed room has shelves in it and a loft (which is reached by a ladder made fast up the side) where the feed is kept. Fig. 4 represents the roosts, two feet apart, of sassafras. Fig. 5 represents a flooring of boards, with the same slant as the roosts, but placed two feet away from the roost. The droppings, falling on these boards, roll down into a trough at the lower end, as shown. In the east side of the house is one large sliding window and in the south side two, with wire fenders or screens over all three. A building of this size and kind can accommodate 200 chickens with ample room.

## Watch the Poultry.

When fowls are judiciously fed, made to take exercise and their quarters kept clean and free from lice, there is comparatively no trouble with sickness, except in cases of contagion.

When the combs and wattles of the fowls are of a bright red color, it indicates a condition of health.

When the fowls are busy scratching, the hens laying and singing and the cocks crowing, these are signs of good health.

When you can enter the henhouse after dark and hear no wheezing, it proves there are not any rumpy fowls in the flock.

When the edge of the comb and wattles is of a purplish red and the movements sluggish, there is something wrong.

When fowls lie around, indifferent to their surroundings, they are fat, and death from apoplexy, indigestion or liver complaint will result unless the trouble is corrected.

When the fowls are restless and constantly picking their feathers, they are infested with vermin.

When young poultry, especially ducklings, appear to have a sore throat and swallowing is difficult, it is the symptom of the large gray lice on the neck.

As soon as a fowl gets ill, isolate it and commence doctoring it at once. The trouble with fat too many is that they wait until the disease is in its advanced stages before giving medicine. A very sick fowl is difficult to cure, and when sick it is seldom of much use afterward—Cable in Massachusetts Ploverman.

## Preserved Eggs.

A chemist has announced that he has discovered a method of treating eggs so that they will not spoil, and he asserts that in the future drinks in which eggs are used will be mixed with eggs chemically preserved. Eggs have been manufactured by artificial means so cleverly that it is difficult to tell them from the real article, but the discovery of this remarkable method of preserving eggs alleges that he is the first man in the field to succeed. Nearly all of the food soda water stands that may be found through the thickly populated New York districts serve egg phosphate during the summer months, and it occasionally happens that an egg of the 1906 model gets mixed with a 1797 phosphate, with result that is disastrous to the soda water proprietor. The inventor of the new method believes that his eggs will do more to the police to keep the peace during the summer months in these districts.

Thus far he has made no explanation of his new invention, but he alleges that it has been thoroughly tested and found satisfactory.

## Poultry Points.

If your hens lay soft shelled eggs, they need more lime.

A warm feed for breakfast goes a long way in inducing hens to lay now.

Is there not room for a flock of geese on your farm? Study the situation.

A generous application of lime on the chicken yard and in the sheds and runs is now in order. It may prove a cheap prevention of disease.

## DUCK FARMING.

Mode of Hatching and Rearing on a Great Poultry Estate.

Mr. William H. Pye of Long Island sends more ducks to the New York market this year than any other raiser. There are more than 10,000 ducks on his place at Eastport, and their capacity for food is about two tons a day. "Talk about summer boarders," said Mr. Pye, "referring to the occupation of several of his neighbors. I guess my feathered boarders are harder than the other kind to keep fed. It keeps me carting grain and meat pretty steadily. We give them chopped up sweet corn for green food and a kind of water grass which grows here. I have a man who spends his whole time fishing, too, to provide a change of diet sort for the ducks, but he doesn't get enough to feed many. We give what fish we have to the ducklings. It is very good for them—makes them grow and keeps them strong."

Last year Mr. Pye shipped 13,000 ducks to market. This year he has raised 19,000, and the hatching season, which begins about Feb. 1, was not over until the end of August. The hatching is done partly by means of incubators, of which Mr. Pye has a large number, and partly by hens, which have the reputation of being better at sitting than the ducks. Besides, the latter are more valuable for laying purposes. Comparing the achievement of the hens and the incubators, Mr. Pye gives the preference to the former with much decision. The method of incubation method seems still the best, a smaller proportion of the hen hatched ducklings being lost than of the others. The hens have prejudices of their own as to the time which ought to be required for hatching, and they do not admit of sitting for the four weeks necessary to bring out young ducks. Consequently they have to be fenced in upon their nests, which they are permitted to leave only for a daily scratch.

Each day's hatching is put into a separate pen. This accounts for the great number of pens and facilitates the selection for shipping by having the birds all in line according to their respective ages. About two months from the time he steps out of his shell the duck is ready for market, so that the first shipments are made about April 1. From that time on the birds are shipped frequently until late in the fall. This year Mr. Pye will keep sending them until December. Last week he sent about 1,000. They all go to Washington market, but a large proportion of them are not used in New York. They are bought up by the seasonable companies in great quantities, and many of them are sold to the proprietors of summer hotels near the city. Mr. Pye's ducks weigh from 5 to 5½ pounds each, and each bird brings him about 65 cents. In the spring the price is sometimes 35 or 40 cents a pound. The expenses of such a farm are heavy, some aggregating \$50 a day, so it is necessary to sell largely in order to make good profit. The loss owing to sickness among the stock is small, having been only 6 per cent this season.

The ducks are all dry picked, and the task of removing the feathers is a laborious one. It gives work to about 14 girls at the neighborhood for three days in each week. These girls receive 5 cents for each duck that they pick, and this system of "piecework" succeeds in stimulating the pickers' exertions so remarkably that the feathers fly briskly all day long. Some girls are so expert as to make \$3 a day and one small child has frequently earned from \$1 to \$1.50. The feathers are excellent for stuffing pillows and are gathered into large bags and sold after the busy part of the duck picking season is over. Formerly the money which the feathers brought exactly paid for the picking, but this season the price of feathers has come down until those on one bird are worth only 3½ cents.

## The White Chinese Goose.

The White Chinese goose was introduced into England some years since by Alfred Whitaker and brought to this country by John Giles of Connecticut. It is of a spotless white, more swanlike than the brown variety, with a bright orange colored bill and a large orange colored knob at its base. It is a particularly beautiful bird, either in or out of the water, its neck long and gracefully arched when swimming. It breeds three or four times in a season, and its period of incubation extends to five weeks.

The geese are prone to extend their bills, but their bills are small for the size of the bird, being not more than half the size of those of the common goose. The spring goslings are easily reared and are the best quality for food.

The disparity in size between the sexes is considerable, often amounting to over one-third of their relative weights. The color, as the name indicates, is a pure, spotless white, which, contrasted with the yellow or orange colored bill and legs, gives quite a pleasing effect, and the goose certainly deserves to rank in the first class of ornamental poultry.

## Large Eggs.

It is a somewhat curious fact that the weight of eggs is materially larger in northern than in southern climates. Canadian eggs, for instance, are heavier than those shipped from the United States, and eggs in the northern states of this country are heavier than those from the south.

### 900 DROPS

## CASTORIA

Vegetable Preparation for Assimilating the Food and Regulating the Stomachs and Bowels of

### INFANTS & CHILDREN

Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral.

Castoria is put up in one-size bottles only. It is not sold in bulk. Don't allow anyone to sell you anything else on the plea or promise that it is "just as good" and "will answer every purpose." See that you get C.A.S.T.O.R.I.A.

The facsimile signature of *Chas. H. Pitcher* is on every wrapper.

## SLOAN'S INDIAN TONIC

### The Only Permanent Cure for Indigestion

This is to certify that I James Rose, Tollgate Keeper, of the Town of Woodstock, Ont., have been a sufferer from Indigestion and a very weak stomach for a number of years and have tried a great many medicines of different kinds, but could only obtain temporary relief for a short time, but after using one bottle of Sloan's Indian Tonic I could perceive a great difference. My indigestion was better and my stomach was much stronger than before, and I found I had gained several pounds in flesh, where I was weak and thin in the flesh before. I think I used nine or ten bottles in all, and I am now a healthy man, but still I do not want to be without the medicine in the house, and I procure one or two bottles every year, and I can truthfully recommend Sloan's Indian Tonic to others suffering from the same complaints.

Price \$1, 6 for \$5. All dealers or address

## TWO GIRL SCHEMERS.

Why the Old Officers Were Chosen Unanimously for Second Terms.

"I expect you had an awful time at the election last night," said the girl who hadn't attended the annual meeting. "For I heard that nearly all the girls wanted to be president and that there was going to be a terrible fight."

"There wasn't," explained the president sweetly, "not a bit of trouble and all the old officers were re-elected too. You see, I wanted to be president myself this year, and Alicia Brown wanted to stay in office, too, so we fixed up a little plan between us, and it was a famous success."

"What did you do? Hurry up and tell me!" the other girl exhorted her excitedly.

"How on earth could you manage it?" the president smiled happily.

"Oh, Alicia and I talked it over beforehand," she said, "and just as soon as the meeting was called to order and before the girls had got through talking she made a motion that the oldest girl in the club be made president always, and Lucile Hicks seconded it. She wanted to be secretary again, you see. So I put the motion, or the question, whatever it was, and Alicia and Lucile said 'Yes' very loud, and all the other girls did the same without understanding what it was all about in the least. My, but some of them were mad afterwards, though!"

"What happened then?" asked the other girl.

"Did they all tell their ages upon protest?"

"No indeed not a bit of it," responded the president, smiling again. "I just knew they wouldn't. When they found out what it meant, they wouldn't say a word, so Alicia got up again and moved that all the old girls be elected over again unanimously. And every girl in the room shouted 'Yes.' They were glad of any way out of the difficulty."—Chicago Times-Herald.

## DODD'S

### For the successful Treatment of all Diseases of the Kidneys and Urinary Organs, Kidney Pills.

Bright's Disease, Diabetes and Paralysis and all forms of Blood Poisoning.

These Pills are put up in large wooden boxes, filled by all the old Dealers—Prescribe by count or in bulk, and never under any other name than DODD'S KIDNEY PILLS.

### IMPORT.

Nov. 10.—Rev. Dr. Galbraith delivered an eloquent sermon to an appreciative audience here Sunday night taking his text from Prov. III 9:10. Mr. P. H. Napanee, Mrs. P. J. DeMille one day last week. Mrs. W. Creeper is visiting friends in Belleville.  
The Cinographic Entertainment given here last Friday evening was a grand success, over fifteen dollars being realized.  
Will Walker, of Belleville has been the guest of S. J. Cotter for the past week.  
T. H. Leslie spent Sunday at home.  
Mrs. Vansiver has returned home after a pleasant visit with friends in Belleville.  
Mrs. Michael Horrigan, of Marysville, has been renewing old acquaintances in this vicinity.  
The new girls mill under the management of W. Barker and B. T. Wilson is now ready to accommodate the public.

### BETHEL.

Samuel Gardner has erected a very neat and commodious dwelling house on his tenant farm. He has secured a very desirable tenant, Wm. Vansiver, who has taken it for five years. We will be pleased to welcome Mr. and Mrs. Vansiver to our neighborhood.  
Mr. and Mrs. John Crawford were at Bloomfield over Sunday.  
Mr. and Mrs. W. A. Crawford were at Gilbert's Mills on Sunday.  
Miss Clara Crawford is visiting her brother at Doxoe's.  
The fine rains of last week ended the long continued drought; plowing is going on now at a great rate.  
The apple crop of this neighborhood was a very heavy one although the most of the farmers sold too cheap for him. I suppose they will be able to judge better another year.  
A little stranger came to Burnham Vaneer's the other day, and the next day after his arrival Burnham went to Plinton and bought a new grade for him. I suppose they will be able to judge better another year.  
Don Rankin, of Brighton, is visiting friends here this week.

### WESTBROOK.

Nov. 8.—The attendance at prayer meeting last Thursday evening was fairly good.  
Joseph Stewart has recovered from his late accident and is now able to attend to his business matters as usual. We would not be surprised if we heard of several weddings in the near future.  
D. Sheehan and sister accompanied by the Misses Sarah and Effie Anderson, of Kingston, spent Sunday last in Napanee.  
Bobby Rowe, the famous tramp, who paid this village periodical visits, died on Sunday last in the county jail in the ninety-sixth year of his age. He was an inoffensive traveller and his only crime was that he was poor and friendless.  
The hum of the threshing machine is heard no longer in our midst.  
A number from here took in the excursion to Rochester on November 1st and report a rough voyage.  
Farmers are wishing for rain as ploughing time is getting quite late.

### GREYNA.

Nov. 10.—The weather changing has put new life in our quiet little village. Each one is looking around now to put in the winter. Chas. Howe has gone in extensively in repairs for his house to be warm for the winter.  
Chas. R. Mellow has about finished his repairs. He has things about right, all the buildings to be overhauled and shingled.  
Ira Alcomback is building a shed for his implements.  
Almost everyone is looking about his premises so as to make them comfortable for the stock the coming winter.  
Plowing has commenced in earnest since the rain and there is any amount yet to be done. Fully two weeks work.  
Our minister is holding special services at Hay Bay with grand results; great numbers attending to the church.  
The Sunday school here will be carried on yet for some time as there is great interest felt for the work. Prayer meeting after the school each Sunday morning.  
Miss Maud Rensen is visiting at her uncle's, Chas. Hough.  
Miss Salisbury is visiting at Ira Alcomback's.

### TYENINGA RESERVE.

The remains of the late Mrs. Jan. C. Maracle were laid at rest at All Saints cemetery yesterday after a short illness of six days duration. Inflammation of the lungs was the fatal cause.  
Mrs. Wm. Green is at present very ill from what is supposed to be inflammatory rheumatism.  
James Brant, Sr., has greatly improved the appearance of his premises by building a neat woven wire fence along the road in front of his residence.  
David J. Brant is also making extensive repairs to his house by re-siding and making other changes.  
David R. Smith has built a good substantial hen house for the accommodation of his feathery stock, having thoroughly constructed it in a manner so as to guarantee the safe wintering of his fowls.  
As regards the expenditure of \$10,000 for the benefit of the young married men who have not heretofore owned or possessed land, an understanding has been arrived at between the Indian Council and the Indian department whereby the resolution passed by a general Council on the 14th day of April will be brought into execution.  
Subject to a change in the fishery regulations next year, the Indian Council will control the right of fishing along the shore of the Bay adjoining the Reserve and intending fishermen will have to apply for right of fishing from the Council.

### IMPORTANT DECISION.

Justice Shaw has given judgement in the matter of the Ontario Voters' List Act, and in the matter of the stated case referred to him by Deputy Attorney General Cartwright. He has decided that the Act is not a law for revision of a voters' list the power to place on the list, or to remove therefrom, the names of persons, as voters, in respect to whom no notice of appeal, in relation to any, or complaint, has been given within the time provided by the Act; that is to say, within thirty days after the list has been posted by the Clerk? His Lordship has replied that such a Judge is not under the Ontario Voters' List Act empowered to do so.

### GERMANY INSULTED.

London, November 6.—A special despatch from Shanghai, received here today, says that the German Minister to China, and the captain of the German gunboat Cormorant, have been attacked by a mob at Wu Chang, a large city in the province of Hoo-Pee, on the Yang-tze-Kiang river. The rioters are also announced to have stoned the German flag, and to have insulted the Minister. But that the despatch concludes, has demanded the punishment of the offenders.  
The news of the 6th.—The news of the attack on the German mission at Ven Chufu, in the southern part of the Chinese province of Sheng Tung, has been officially confirmed. A flag attached to the mission was torn and trampled. Ziefeler is missing, and Steng ordered that the necessary measures be taken at Pekin to obtain redress for the outrage.

### GIFTS FOR CHILDREN.

Helon Jay, writing in Harper's Bazar concerning gifts for children, says that they are always delighted with the unexpected, and are often more pleased with some common offering than with more costly toys. She instances a dainty little model of a miniature house in dolls and a critic of miniature china, who went into raptures over a large market basket sent her by a former nurse. A tag attached to the basket read, "Kape the basket, Darling." The contents were three large eggs, a small loaf of cake, a comb of honey, a bottle of milk, and a Bunsen. Taking up the book in her hand, the little said gravely, "This is just what I needed," and from that time forward Jane's Bible was the most valued of the owner's belongings, while the market basket was the delight of the owner's heart.

### NORTHERN NEW YORK.

As the result of a quarrel over the game of poker, George Pangloss, the proprietor of Buck Pond hotel, four miles west of Charlotte, shot and killed Louis Karl, a wood worker of Rochester, and then shot himself, dying instantly.

Ex-Mayor McCaffery, of Oswego, who died last week, was the son of a British soldier.

John D. Higgins, Republican, was elected mayor of Oswego by a majority of 250. The Republicans also elected five out of eight aldermen.

Wm. J. Bellen, republican candidate for member of assembly, died suddenly at Batavia on Tuesday.

The Republicans carried everything in Wayne county.

Mayor Warner, democrat, was re-elected mayor of Rochester by a majority of 3,000.

Ren Dodge and Margaret E. Clark, both of Cape Vincent, were married on the 2nd inst.

Miss Arie S. Huntington, daughter of Bishop Huntington, was elected a school commissioner on the Democratic ticket at the election.

James F. Pappas, formerly of Newburgh, has been elected an alderman of Watertown.

Mayor Wm. was re-elected in Watertown by the small majority of 17.

Rev. A. W. Cross, pastor of the Universalist church, Fulton, has resigned.

At Plessis, Jefferson Co., A. C. Robertson was drawn into the belt of a grist mill and killed.

James Wm. Resident of Lowville, went down cellar for a drink of wine but by mistake drank some other fluid, with fatal results.

Contracts have been let for the improvement of the Champlain canal.

A farmer near Massena thought to convert the St. Lawrence Power Company from crossing 1,000 feet of his farm with their railroad. While he slept one night recently, the company put a large force of men at work and when the farmer rose in the morning the railroad was finished and cars had been run over it.

George F. McNulty, aged 22, turnkey of the jail at Canton, St. Lawrence county, in a fit of melancholy committed suicide by hanging himself.

The survey for the deep water canal has been finished as far south as Minetto.

Crunk Adams, a former resident of Watertown, was killed at Kingston, N. C.

Kearney Thompson, aged 55, of Ogdensburg, has committed suicide by cutting her throat with a razor.

Dr. A. J. Dick, of Watertown formerly of Ogdensburg, has been elected coroner for Jefferson county.

About 300 tons of coal were lost by fire at the Fulton Synagogue. Fire due to spontaneous combustion.

SOMETHING STARTLING.

There is something all should know in this land of peace and war.

The fact that they would not a price in the English market equal to anything the farmers across the line are getting.

A bylaw authorizing the sale of \$13,000 debentures to meet deficiencies of former years was carried by 132 to 22 in Belleville.

### ALTHEA.

#### A REMINISCENCE.

I hold it true, that on this rugged shore,  
In other distant years hast thou and I,  
A hundred other times new-sprung to birth,  
A hundred other times to live and die;  
Each life to God and Heaven mayhap more near,  
Or deeper sunk as mine, each circling year,  
And thou, Althea, priestess of a fane,  
That blind humanity in purple years,  
Slaves of a burning passion, strove in vain  
To break the bonds that filled their souls with fear,  
For in thine eyes there shone as now do thine,  
The unobscured light that once burned into mine.  
For then, as now, the votary of love,  
But love unhalloved by sincerity:  
More breaths of passion from the gods above,  
Cursed but blessed in their rarity.  
Still doth thy soul exist on starry delight,  
Still cling thy heart to secrecy and night.  
Perchance in other years in some far clime,  
Where burning suns beamed fiery from above,  
Where slumberous blooms exhaled a breath sublime,  
And men lived wrapped in one long dream of love,  
Perchance was I ensnared by that which lies,  
Hid in the inmost depths of thy veiled eyes.  
But now the spell of years has lost its power,  
The hiding veil is rent,—with baffled mien,  
Thou dost reveal, revealed, a wanton heart, the hour  
A stranger, new-faced doth intervene;  
But alas, Althea, I have thee forgot,  
That turning kiss that lingers with me yet.

Deseronto, November, 1897.

#### A BIG SHIP WRECKED.

Halifax, N. S., November 7.—The ship John McLeod, from Delaware Breakwater, bound to Halifax, with a cargo of raw sugar, was wrecked on the night of the 6th inst. at midnight last night and foundered at noon today. The weather was very thick when the disaster happened. After striding the ship backed off, but was making water very fast and settling in the sea. Part of the crew took to one of the boats and landed at Devil's Head this morning. The remainder stayed on board for several hours, when they were spoken by a pilot boat and then decided to abandon the ship, fearing that she would go down before they could get away.

One of the pilots determined to make the effort single-handed to save the ship, and he stayed on board alone while the others were sent to render assistance.

One of the pilots determined to make the effort single-handed to save the ship, and he stayed on board alone while the others were sent to render assistance.

### DISTRICT ITEMS.

Fall arrives at Napanee on the 22nd inst.  
Yarker is lighting its streets with lamps.

There are only seven prisoners in the Belleville jail.  
A horse trading convention will be held at Frankville today.

A roller rink will again delight the people of Belleville.  
There are 450 patients in the Brockville insane asylum.

John Grant, of Plinton, had nine sheep killed by dogs.  
Wm. Kincaid is building a fine brick house at Moneysville.

The Methodist church at Petworth is undergoing repairs.  
James Smith, of Napanee, died on the 3rd inst., aged 63.

The first frame barn in Oxford township was raised in 1801.  
A Smith's Fall C. P. R. engineer drew \$100 in wages last month.

The dredge Queen will be repaired at Belleville this winter.  
Cobourg will likely have two large summer hotels next season.

Mrs. Wm. Murray, Kingston, died on the 3rd inst., aged 53.  
Clarence Casky, of Tweed, had his foot badly cut by an axe.

The grain elevators at Prescott and Ogdensburg are again blocked.  
A ledge of Sons of Temperance will be formed at Robin's Mills.

Chas. Calder will be the Conservative candidate in South Ontario.  
Heavy shipments of cattle have been made from Tweed to Buffalo.

Several parties have been fined for illegal fishing in Charlton Lake.  
A Peterborough man may buy the Jones warden mill at Tamworth.

Bella Thompson has purchased the Little farm Phillips corner.  
B. Leavens, Hallowell, grew an ear of corn sixteen inches in length.

The steamer North King sailed 32 miles during the past season.  
The Hotel Kingston, Kingston, is completely filled with patients.

The steamer Merritt has been carrying canned goods from Plinton to Brockville.  
Hugh McConnell, of Merrickville, was badly hurt by falling from a sawhorse.

The Kingston and Newboro stage will run from Kingston to Westport.  
Mrs. Staines, of Perth road, formerly of Batters, passed away last week.

The Ontario and Canadian Oldfolks has been organized at Carrying Place.  
About 25,000 bushels of buckwheat was raised in South Marysburgh this year.

The Athens division of the Sons of Temperance has organized a mock parliament.  
Justice Coon, an aged and respected resident of South Crosby, died last week.

Rev. M. H. Wilson, of Queen's College, will be inducted into the charge of Chalk River.

Wm. B. Ball, postmaster, Bath, is building a new building for the post office.

All the factories at Yarker will be kept very busy during the coming winter.

Miss Fitchett, formerly of Huntingdon township, near Roslin, died on Oct. 27.

The locomotive works in Kingston will build new engines for the Intercolonial railway.

A couple of farmers drove into Annapolis market on Sunday morning, thinking it was Saturday.

Rev. J. Mackie, of Kingston, is building a pretty summer residence near Batters.

The G. T. R. has been laying down new steel for a long distance west of Ganouke.

John Keen, of Oates, and Anna M. Doyle, of Camden East, were married on Oct. 27.

The Anglicans have purchased Geo. Aylsworth's house in Odessa for a parsonage.

Quadrant cattle are being rushed across the St. Lawrence to United States markets in vast numbers.

W. Birrell, Napanee road, has rented Mrs. Lewis Dalry's farm on Little Creek, North Frederick.

Walter Hall, of Pouchers Mills, and Maria Hamby, of Napanee, were married on October 27.

Miss Gaudier, Newburgh, has completed her training as a nurse in the Kingston general hospital.

Albert Simpson, and Inez Allen, of the High shore, Prince Edward, were married at Napanee last week.

Patrick McGrath, railroad contractor, aged 43, formerly of Kingston, was killed at Hibbing, Minnesota.

Alex. McCallum, employed at the Belmont mine, fell in a fit from a scaffold and was seriously injured.

Dr. A. J. Hammond, of Winnipeg, and Miss Murphy, of Rock Island, were married last week.

The new school house for section 15, North Frederickshire has been completed and will be named "Julia."

Wm. Madden, of Montreal, and Miss K. Murphy, of Rock Island, were married at Tweed, on October 27.

The Brockville cheese district has added to the system of branding their cheese. Others will follow their example.

Ogdensburg Advertiser: W. E. Rees, leader of the Gananogue Citizens Band, has written a very pretty march dedicated to the town of Prescott. It is estimated that the march will likely become popular for funerals.

## PROFIT IN POULTRY.

What an Enterprising Man With Small Capital May Do.

A correspondent of The Country Gentleman describes a poultry farm he visited some time ago to show what an enterprising farmer who is looking for larger profits can accomplish. A small farm, mostly in timber, had having a few acres of tillable land and a comfortable house, had been purchased very cheap. The timber had been cut and nearly enough lumber and stove wood marketed to pay for the farm. A part of the lumber had been saved and used for building poultry houses. Several of these houses had been built out of the rough lumber, the owner doing most of the work himself. They were double bearded, with paper between the boards, and the board roofs and earth floors were made and windows on the south side. They were made very warm, but no money was spent on appearance or ornament. The inside fixtures were few and simple. The houses were 30 to 40 feet long and about 12 feet wide. On one side were the perches, running the whole length of the building, with a platform under them. On the other side were nest boxes and feeding troughs. The space between these was given to the hens for a scratching floor and covered with hay or straw.

These houses were several rods apart, and from 100 to 150 fowls were kept in each. The houses contained no divisions, and the fowls were not yarded, but had the whole range of the farm. Instead of fencing in the hens he had fenced in his garden and other places he wished to protect from them. Near the buildings were some springs of running water. This water had been carried to some of the houses in pipes, so that fresh water was easily provided for the fowls. Centrally located near the houses was a granary, which was quite large and contained a stove with a large kettle for cooking the meat which was fed to the hens in the winter. In the building was also a power bone mill for grinding the bones.

But few chickens are raised on the farm. Every fall the owner starts out with a large wagon filled with crates to buy chickens. He buys both the pullets and cockerels at the market price by weight, keeps the pullets for his laying stock and ships the cockerels to the city. He keeps his hens two years, and then culls them alive and ships them to the city market in August and September, so he must replace one half of his stock every year. He obtains nearly as much for the fowls he sells as they cost, so saves the trouble and expense of raising chickens. Of course by this plan he cannot keep thoroughbred stock, but he says that he is in the business for the money there is in it, and there is more money for him in buying chickens than in raising them.

The reason why this man is able to make a good profit from his hens is that the greater part of their food is produced on the farm. As fast as his land was cleared it was sown with grain, which saved his money in buying grain for his hens, and now, after years of hard toil, he has removed the stumps and stones and fitted his land for growing crops, so that now he can grow about all that is wanted for his hens and team, and their manure furnishes the fertilizer. His family do most of the work in caring for the hens in the summer, so that he is able to give his time to his farm work.

His hens pay him a profit of nearly \$1 each, for there is but little outlay for food. Probably \$700 to \$800 is received for eggs. A buyer comes after them twice a week, and as he can get so many clean and fresh eggs at one place he pays 1 to 2 cents above his price for common eggs. If, to the amount received for eggs we add the produce of the orchard and garden, house rent, etc., the income is about \$1,000 per year, with an investment of only perhaps \$3,000.

There are many small farms of 25 to 50 acres, with a house and other buildings, that in these times can be purchased very cheaply, and an outlay of a few hundred dollars would erect suitable buildings and stock them with poultry. Ten or 15 acres of oats, buckwheat, corn and perhaps other grains, with cut clover, milk, etc., would furnish food for over 500 fowls. Two or three cows could be kept and fruit and vegetables grown for family use. For a man and family of children who can assist in caring for the poultry, and who has some capital, there seems to be a better prospect to make a living than in dairying or other kinds of farming at the present time. Nearly every business is full and pushed to the utmost, and because of the intense competition and large production the margins are growing smaller. If we engage in a business that requires skill and the close attention to details that many persons are not willing to give it, we can, to a certain extent, get out of the general competition and make fair profits.

## Hard and Soft Food.

If any one will molest a gill of cornmeal, it will be noticed that a large quantity of water will be absorbed. This water is taken by the feed voluntarily, but through necessity, in order to accept the food offered. Naturally the fowls drink but little water, and the crop is full of water. With the crop is packed with soft food and digestion is slow, decomposition begins, being hastened by the animal heat of the body. When the food consumed is dry food and must seek it, the first portion is digested before the last enters the crop; hence when it drinks there is but a portion of the food eaten moistened and the crop is full. This material has been alluded to before, but it is one which should attract attention and receive consideration. To give soft food when it is needed to do so is correct, but such food should be given only in limited quantities, and the ground food should be given dry in the trough, if possible, instead of forcing more water on the birds than they really require.

## TURKEY MANAGEMENT.

How to Secure the Best Price—Fattening, Dressing and Sorting.

Success in securing a large number of little turkeys depends upon the winter and spring management. It is, however, one thing to raise a large flock and another to put it in the best shape for market. Many old and successful growers are not well up on this end of it. If their methods were improved and more care taken in fattening, dressing and sorting, as well as in packing them as the trade demands, much better prices would be received. Beginners who have succeeded fairly well in raising a flock are often all at sea when it comes to preparing them for market.

Rhode Island turkeys are famous for their quality. Some of our readers may remember the appearance of those turkeys exhibited in the dressed poultry department of the Boston show. In the best markets in New York city, Providence, Newport and Boston they lead those from other sections. In the same markets they often bring 10 or 12 cents more than those from all other states except Connecticut. About New Year's a leading New York paper quoted Rhode Island turkeys at 28 cents and everything else in the turkey line at less than 17 cents. Many growers are interested to know the reason.

It is not their fame in the past or because they are scarce that they sell for the most; it is on account of their superior quality. Much of this high quality is due to the plump, compact breeding stock used and to the way it is managed; also to the care taken in growing and fattening the young turkeys. The pains taken in dressing and preparing them for shipment, however, probably does more than all else to give them their high standing.

Of course you cannot dress a thin, flat bodied, long legged bird so it will sell well, but the bird must be plump, best shaped and most attractive bird in every way previous to killing may be so dressed that it must be classed with that which is inferior.

Again, the handiwork young turkeys that are perfectly dressed if packed along with ill dressed ones and with tough old toms and hens must be classed with the latter and go for less than they are worth. Too many send nothing but "fat" to the stock market. In many cases it is simply because they do not know how to prepare it so it will bring all that can be got for it.

Successful Rhode Island growers as a rule feed their turkeys from start to finish on northern wheat. This is the grain which they grow themselves. They take great pains to use nothing but well seasoned old corn, because they have found that new corn causes bowel trouble, which is more to be feared in a turkey than any other form of ailment, and fatal. Diarrhea seems to be more prevalent among turkeys than any other disease, and a bird that gets sick is apt to die. Foraging in a field of green oats may give them diarrhea and much loss. Turkeys are not so northern as that corn best and fatten best on it, but it makes their flesh more tender, juicy and delicious. That given the little ones is coarsely ground and mixed with sweet or skim milk or into bread, that is moistened with milk. This is gradually mixed with cracked corn, which, when they are about 8 weeks old, is fed clear or mixed with sour milk. In the fall whole corn is given.

Turkeys which can be given full liberty from the first on a dry pasture lot and after a few weeks allowed to roam and roost wherever they choose thrive the best if they escape accident or enemies. Two turkey hen mothers and their broods will, generally, join forces, apparently for mutual protection from hawks and other enemies. Where they cannot be given full liberty they should be given fresh grass pasture daily and milk and corn given in the morning, as well as corn, to take the place of insects. Great pains should be taken that they are not overfed and that they are given as much liberty for exercise as is possible. The brood may be prevented from leaving a certain flock by singling the mother turkey so she cannot fly over the wall or fence. This, however, places her at the mercy of dogs.

After June 1st those at full liberty are fed but twice daily.

Resorts like Newport use hundreds of partly grown turkeys in July and August. From \$1.75 to \$2.25 is given for those weighing from 1½ to 4 pounds each. They are sold to dealers who supply clubs, hotels and wealthy private families. These small turkeys are very lean and tender, and soon spoil or become discolored even if placed on ice; therefore only nearby raisers can handle this trade.

If there is much risk or loss from disease before the turkeys can be matured, or if the number grown is so great as to overstock the place, it may be advisable to turn them off at this age.

Possibly there are many other sections where small turkeys can be profitably marketed in this way. If our chickens, ducks and geese can be sold at great profit for money when partly grown than if kept until much larger and fed twice or three times as long, there may be possibilities for the enterprising turkey raiser in this direction.—Samuel Cushman in Farm Poultry.

## Points For Shippers.

One of the greatest mistakes in shipping live poultry is that of mixing fat hens and roosters in the same coop. The hens cannot be assisted in bringing better prices by having males with them, while buyers will not buy in large lots and pay good prices for mixed stock. The roosters only take up room in the coops and assist in crowding the hens. If it is not possible to have them "choiced" in the market, if roosters must be sent, put them into a separate coop. It means a difference of several dollars on a coop of fowls if they are shipped properly stock and well cared for, and no fowls should be sent to market unless they are fat—Farm and Fireside.

## CAUSES OF GRAY HAIR.

Gray hairs are honorable no doubt, but their advent is not usually hailed with any exultant joy by men and certainly not by women, and it is curious to note in going through life at what varying ages people commence to show the passage of time by the change in the color of the hair. And yet the whitening of the hair does not always portend the approach of age, for the hair of some individuals has been known to become gray in a single night.

Many reasons have been suggested for gray hair. Some assert that the cause is the contraction of the skin about the roots of it, and from this cause suppose that polar animals become white, the cold operating as the contracting power, but this theory is untenable, or we might all turn gray if we happened to be exposed to particularly hard frosts. As a matter of fact, there are fewer gray people in Russia than in sunny Italy or Arabia. The more likely reason is that the vital power is lessened in old age, and the extreme vessels of those animals, imperceptible vessels destined to supply the hair with coloring fluid, the vessels which secrete the fluid cease to act, or else the absorbing vessels take it away faster than it is furnished. This certainly appears to be feasible, for grief, debility, fright, fever and age all have the effect of lessening the power of the extreme vessels. Against this theory it may be urged that if the body be again invigorated the vessels ought, according to our reasoning, to again secrete the coloring fluid, but this is not what is really the case, the vessels which secrete this fluid are so minute that upon their ceasing their functions they become obliterated and nothing can ever restore them.—New York Ledger.

## Trade Devices on Wheels.

Various familiar articles of trade are used as models for the bodies of delivery wagons. Of these the trunk is perhaps the most commonly used. Wagons made after the pattern of the trunk, and which can be seen in many cities, the delivery wagons of the dealers in trunks and kindred articles. Perhaps the next most familiar is the wagon with the body in the form of a great hat, the delivery wagon of a hatter. Another form not unfamiliar is that of a horse-drawn wagon, made of metal, and with the body in the shape of a delivery wagon of a shoe dealer. Like the great hat, the shoe may be painted or gilt. All of these vehicles are used in the city, in front, and they have a door at the rear end. The shoe is mounted on the running gear, with the door to the front. The driver's seat is over the top of the door, in front of it. The door by which parcels are got in and out of the wagon is in the heel of the front wheel.

A wagon used for the delivery of packages from a laundry has a body in the form of a great wash boiler. Perhaps the latest of these trade devices is the one shown in a wagon used for the delivery of a proprietary article, that is sold in liquid form. In this case the wagon body is in the shape of a great bottle.—New York Sun.

## Finally Convinced.

"I have been a great many years reaching the conclusion," she said, thoughtfully, "but I guess I may as well admit that my husband is the most indolent man alive."

"When did you discover it?"

"Yesterday evening. He punctured his bicycle tire. Instead of going ahead and fixing it, he sat down for half an hour to see if it wouldn't get its second wind!"—Washington Star.

## FATAL RAILWAY ACCIDENT.

A lamentable collision, resulting in the death of Dr. H. B. Wray, of Napane, occurred on the G. T. R. at Lansdowne, at three o'clock last Sunday morning. Dr. Wray, of Napane, was driving a horse-drawn carriage, and was struck by a passenger train. The train was carrying a large number of passengers, and the collision was a very serious one. Dr. Wray was killed instantly, and the train was stopped. The passengers were all safe, but the collision caused a great deal of damage to the train and the carriage. The cause of the accident is being investigated by the railway authorities.

Address: POPULAR MUSIC CO., Indianapolis, Ind.

## POULTRY HOUSE FIGURES.

MR. EDITOR:—I observed a cut of a poultry house in last week's paper in which it is given 16x20 feet, supposed to hold 200 fowl with ample room for same. This is about 320 feet floor space or 20 inches per bird. Having kept fowl for several years or what there was in it, I find that it takes about six feet floor space per head to keep fowl in a proper condition for laying. When poultry are crowded together, they will fight and when they fight they will kill. Your correspondent does not state the size of his fowl room, which certainly the fowl space still more. Now suppose we put 200 fowl in a room and allow 20 inches each, you can easily see that the half of them will not be able to get to the feed. I have seen fowl in a room of this size, and I have seen them die. Besides they will breed a kind of disease and vermin which are always to be found in a crowded poultry house and I venture to say that if the fowl are kept in a room of this size, they will be a much sicker and poorer man by spring.

Yours truly,  
R. H. MITCHELL.

Deseronto, Nov. 11th, 1897.

## CARD.

We desire to thank the many kind friends and neighbors who so willingly extended assistance and innumerable acts of sympathy during the fatal illness of our dear daughter, the late Mrs. Anne Dwyer. We thank them also for their attendance, and the obsequies and assure all that these marks of respect for the deceased and the sympathy extended to ourselves will ever be remembered with gratitude.

MR. & MRS. JOHN JOYCE.  
Deseronto, November 6th, 1897.

## FARM TO RENT.

## BAYFIELD PATRICIDE.

HARVEY ELLIOTT SHOT BY HIS BROTHER.

Jealousy Said to Have Existed Between Them—Their Mother and Sister Saw the Deed—The Young Men Had Been Drinking Freely.

Clinton, Nov. 10.—The village of Bayfield, one of the quietest spots in Canada, has been the center of perhaps one of the most sensational events that have occurred in the history of the province since the death of the father about one year ago, has been run by two sons, and a faithful brother, Harvey Elliott to-day is a victim of his brother's mad frenzy, having been killed by a bullet fired by his brother Fred, a boy of nineteen years.

From what can be learned from the villagers, who are loath to give particulars, the facts of the case are as follows: Both had been indulging too freely in liquor, and about 8:30 p.m. Harvey Elliott, along with his brother Fred, who had taken a drive to Varna, a small village about four miles distant, returned, and a dispute followed which led to a quarrel. While the brothers were still quarrelling, Dumart and another friend named Woods appeared from a neighboring town to purchase liquor and cheese for a lunch. When Woods and Dumart returned they found the brothers still quarrelling. What passed between them is not known, but shortly afterwards Harvey went outside the hotel, followed by his brother Fred, who at once fired at him, the ball entering the chest, passing through the lungs and trachea. Death was very quick, he having died shortly after medical aid was called. He died profusely from the mouth and the wound was very deep.

His friend, Albert Woods, and his life's blood tells the story where the fatal deed was done. He was at once carried to the hospital, but he died immediately after being carried in. The affair was witnessed by his mother and sister, who were both very much shocked. Many stories are afloat as to the cause of the trouble, but perhaps the most likely is the one of jealousy over a young girl, the woman who died the deed is known to be of a quiet disposition, and after learning of the terrible deed he had done, exclaimed, "My God, why did I live to bring this trouble upon my mother?" He feels his position most keenly and now realizes the full enormity of his act.

## WINDSOR NEWS.

A Flying Roller Assaulted—Sequel to the Flag Incident.

Windsor, Ont., Nov. 10.—The threatened assault against the citizens of Flying Rollers, of this city very nearly took place last night. David McKay, one of the most prominent "rollers," left his home at 8 p.m. and went to the "God House," but when he had covered about half the distance he was stopped by half a dozen men, who were armed with clubs and stones. McKay struggled desperately to save his hair, and managed to break through the crowd, and took refuge in a nearby store. The proprietor of the store was friendly towards him. A big revolver then made its appearance in the hands of one of the men, which had the effect of quieting the crowd and they dispersed, leaving McKay to get home the best way he could. Some time later, the "New Eve" store was smashed in, but no one seems to know who the culprit was. The people in the vicinity of the "New Eve" store were very much incensed at the manner in which the disciples of Prince Michael carry on, and they say the threats to tar and feather him will be put into effect some day.

Mr. Thomas Kinsella, who for the past 12 years has occupied a prominent position in the offices of the Walker and Sons, Walkerville, will sever his connection with the firm to-morrow, owing, it is said, to the flag incident. The firm is in the habit of carrying on in the early part of the summer. An Irish flag had been hung upon one of the gates at the Walker firm, and on the 10th inst. it was seen by Mr. Robbins, manager of the Walker firm, who pulled it down. The affair occasioned much comment at the time, and the act was, it is said, by several Irish societies. The story goes that persons came from the United States to inquire into the affair, and met Mr. Kinsella, who told them that he knew. Afterwards he was called into the private office of the Walkers, and questioned as to what he had said about the matter. Mr. Kinsella said that he had no reason for his discharge. Mr. Robbins declined to discuss the affair in any way.

APPLE SHORTAGE IN THE UNITED STATES.

The American Agriculturist estimates the apple crop of the United States for 1897 at less than thirty-seven and a half million barrels, as compared with nearly seventy million last year. The big falling off has taken place in New York State which produced about 4,000 barrels less than last year, as against eight and a quarter millions last. Maine's production has also fallen, and the total for the United States is less than a half million.

## RUSH FOR THE KLONDIKE.

Windsor, Man., November 6.—A gentleman who arrived here from Vancouver to-day, says that the agent of Messrs. Coombs and Sons, the tourist agents, have engaged about 4,000 men to go to the Klondike in the month of January. The figures forwarded for food, meals and accommodation, each man was \$4 per day, or an aggregate of \$16,000. This will give some idea of the big rush that is being expected to the Klondike early next year.

## TAKES A HINT FROM MARY.

Mary had a little lamb.  
You do not look surprised;  
Of course you don't for Mary has  
Been widely advertised.  
And she has a good reason to learn from this,  
If you are not as wily known  
You may be just as widely known  
And she has a good reason to learn from this.  
And you are known well,  
That folks will confidently buy  
The things you have to sell.  
And when you have got yourself  
Into the cheering ray  
Of the sunlight of publicity,  
You bet your life it pays!

## LATEST MARKET REPORTS.

Toronto, Nov. 9.

Wheat—The market was weak in Chicago, and rather heavier here, particularly for Manitoba. No. 1 hard, track, 60¢; No. 2, 59¢; No. 3, 58¢. Port William, could be bought at 60¢ Ontario No. 1 red, north and west, sold at 60¢ and middle freight at 33¢, but the demand was not so good as it was Saturday, owing to the heavy tonnage in United States markets. Good wheat was quoted at 76¢, middle freights, and No. 2, 75¢, middle freights.

Quota—Quiet and steady. Bran is quoted at 8¢, and shorts at 10.50 to 11¢, middle freights.

**THE DEAF HEAR.**  
**DR. CHASE'S CATARRH CURE**  
Working Wonders in Toronto.  
Gave MRS. BINDON her hearing when Specialists failed.  
About 8 years ago, Mrs. Bindon, of 11 Market St., was attacked with a cold in the throat, which affected her hearing to such an extent that she was completely deaf. It was some 12 weeks before she was able to hear, and she was then advised to consult a prominent specialist on ear diseases, but to no avail. She was then led to Dr. Chase's Catarrh Cure, and before she had completed 3 boxes her hearing had partially returned. She persisted in the application of the remedy, as confident was she of ultimate cure, and, in a few days, her hearing was ever more delighted than Mrs. Bindon. For 3 months now she has been free from deafness, and is as unimpaired as ever. On Sunday she goes to church and enjoys the service, a thing which she was unable to do before Dr. Chase's Catarrh Cure gave her back her hearing.

**PRICE 25 CENTS A BOX.**  
Sold by all Dealers, or by Messrs. Eaton & Co., Toronto, Ont.

## Adams' Tutti Frutti Aids Digestion.

Some dealers try to palm off imitation to obtain a big profit. Be sure that the trade mark name is on the wrapper. It is on each box package. Save coupons for latest box and prizes.

A citizens band has been organized in Kingston.

Judge Wilkinson, of Napane, was sixty years of age on the 3rd inst.

Peterborough will have a poultry and dog show, Jan. 18, 19 and 20.

The house of R. Garrett, Albert, was broken into and some clothing stolen.

Rev. J. R. Black, pastor of the Bethel Congregational church, Kingston, has resigned.

Capt. Cook, of "A" field battery, Kingston, leaves for Picton, N.S., prior to leaving for Africa.

William Walter, aged 15, eldest son of Walter Walter, Belleville, died suddenly of appendicitis on Monday.

A fire damaged the Grand Trunk wharf and burned forty cords of wood at Belleville last Saturday afternoon. Loss \$300.

George Merrill, of Belleville, a brother of Judge Merrill, Picton, died on Monday, aged 68. He was native of Prince Edward.

## A TERRIBLE TRAGEDY.

FOUR CHILDREN POULY MURDERED NEAR RAWDON, QUE.

Rawdon, Que., November 4.—Four mangled and mutilated corpses are tonight the evidence of what is undoubtedly the most horrible and mysterious murder in the annals of the Province of Quebec. Three of the dead are girls, and the fourth a boy, the children of Michael Nulty, a farmer, who lives four miles north of this place. The victims are Elizabeth Nulty, aged eighteen, Anne Nulty, aged fourteen, and Patrick Nulty, aged nine.

On Thursday evening, Mrs. Nulty drove to St. Julien on business, starting at an early hour in the morning, leaving their children at home in the care of the eldest girl, who is now home situated at some distance from any other habitation. In the afternoon a trader from Chatham, named Morin, drove up to the Nulty home. He was somewhat surprised at seeing no signs of life around the place and still more astonished to find that the front door had been broken open. He entered the house and to his horror discovered the headless bodies of a boy and a girl lying on the floor of the main parlour. A hurried glance around the room showed traces of a struggle; the bodies of the dead children bore even more direct evidence that the two defenceless children had been fought and killed in their room. Their clothing was torn and saturated with blood, while the floor and even the walls were spattered with it. The severed heads of the children lay by the bodies. Midway between the house and the barn Mr. Morin found a third body. It was that of the second girl, who had been killed in the barn. Her head was found in the barn. The body of the third child, who had been killed in the barn, was found in the barn. The body of the fourth child, who had been killed in the barn, was found in the barn.

Mr. Morin summoned the neighbors and subsequently a messenger was sent to the parents, then homeward bound, to tell them of the sad news. The grief of the parents at their arrival home was terrible to witness.

Neighbors flocked to the scene by scores, all anxious to help in the capture of the murderer. A tramp was naturally the first person suspected and it was not long before a person was seen around the premises on the way of the murder. News of the terrible tragedy was at once telegraphed to the several bodies of the children lay by the bodies. Midway between the house and the barn Mr. Morin found a third body. It was that of the second girl, who had been killed in the barn. Her head was found in the barn. The body of the third child, who had been killed in the barn, was found in the barn. The body of the fourth child, who had been killed in the barn, was found in the barn.

Thos. Nulty, brother of the murdered Nulty children, was subsequently arrested and lodged in the jail at Joliette. On his confession of the crime he made a confession to Detective McCaskill, narrating the manner in which he had done the terrible deed. He said that he could not remember exactly about the murder of the two youngest children. He did not tell the motives which had led him to commit such a fearful crime, but it seems that the brother and sisters had frequently quarrelled and it is thought by some that the girl who was killed in the barn was one of these outbursts of temper. Others think that he was desirous of getting married and as the little girl was his sister, he thought that by crowding her took this method of making room. The family are very ignorant, living at a distance from neighbors, and the tragedy was a complete mystery to them. Their home is of a wretched description, the two sisters of the murdered girl, who were both young and married, and the other had been only a week in domestic service at Montreal. Both are heartbroken as a result of the awful tragedy.

Thos. Nulty, brother of the murdered Nulty children, was subsequently arrested and lodged in the jail at Joliette. On his confession of the crime he made a confession to Detective McCaskill, narrating the manner in which he had done the terrible deed. He said that he could not remember exactly about the murder of the two youngest children. He did not tell the motives which had led him to commit such a fearful crime, but it seems that the brother and sisters had frequently quarrelled and it is thought by some that the girl who was killed in the barn was one of these outbursts of temper. Others think that he was desirous of getting married and as the little girl was his sister, he thought that by crowding her took this method of making room. The family are very ignorant, living at a distance from neighbors, and the tragedy was a complete mystery to them. A deputation of native Hawaiians will visit Washington shortly to protest against annexation to the United States.

It is estimated that as many as 60,000 farmers and others in France make their living by the manufacture of Roquefort cheese.

The Spanish Government have decided to court martial Gen. Weyler for his utterances on the occasion of his leaving Havana.

The largest number of tracks in any German railway passenger station is at Frankfurt—twenty-one—Munich coming next with sixteen.

Lourdes saw its first exclusively British pilgrimage this year. There were sixty persons in it, including a bishop and eight priests.

Under threats of declaring her independence, Turkey has acceded to Bulgaria's desire for heretofore Bulgarian bishops to Macedonia.

It has been decided to appeal to Europe and America to raise the sum of one hundred thousand dollars, with which to relieve the terrible distress existing in Greece.

A man named Dreyfus, living in Paris, who recently suffered losses on the Bourse, his wife, and three young daughters, all committed suicide Monday morning.

The West India Cable Company's lists of shares closed on the London market. The applications for bonds and shares were from two to three times the amount required.

## Poor Blood

When a horse is poor in flesh, a new harness won't give him strength. If a house is cold new furniture won't warm it. If your strength is easily exhausted; work a burden; nerves weak; digestion poor; muscles soft; if you are pale and worn out, the trouble is with the blood. It is not so with the blood. It is not so with the blood. It is not so with the blood.

## NINETEEN WERE LOST

STEAMER IDAHO GOES DOWN OFF LONG POINT

In a Terrible Gale—Only Two Left to Tell the Story—Battered by the Waves—Hull Shattered—Survivors.

Buffalo, Nov. 7.—The steamer Idaho of the Western Transit Line, which left this port Friday afternoon in the face of a big gale from Chicago, loaded with packet freight and carrying a crew of 21 men, foundered off Long Point on Saturday night, when, according to the report of a lifeboat, she was struck by the waves of a fierce battle with the angry Erie from the Canadian shore about 40 miles west of Buffalo, and its vicinity.

The news of the disaster reached this city on the arrival of the big steel steamer Mariposa shortly after 11 o'clock Saturday night, when, according to the report of a lifeboat, she was struck by the waves of a fierce battle with the angry Erie from the Canadian shore about 40 miles west of Buffalo, and its vicinity.

The news of the disaster reached this city on the arrival of the big steel steamer Mariposa shortly after 11 o'clock Saturday night, when, according to the report of a lifeboat, she was struck by the waves of a fierce battle with the angry Erie from the Canadian shore about 40 miles west of Buffalo, and its vicinity.

WEAK AND WEARY WOMEN FIND A REAL FRIEND IN SOUTH AMERICAN WINE.

ERHARTS was a cynic, but some one has said that in this age there are no healthy women. There are many who are physically and mentally weak, and who are suffering from nervous debility. They drag out a weary existence, and each day a day of pain and suffering. This is the case with Mrs. J. C. Hanley, of Belleville, N. B. She suffered terribly from indigestion and nervousness. She was a South American Wine, and she found it like hoping in a nebula. Of course, it was not the wine, but she had taken only one bottle when her system began to take on the health of earlier years, and after using three bottles, she was completely cured. No wonder she is strong in her conviction that there is no remedy like South American Wine.—20.

### KINGSFORD.

Nov. 15.—We are having very nice weather and the farmers are taking advantage of it, all being busy fall ploughing.  
Our young people are enjoying themselves immensely. These times, parties of almost nightly occurrence.  
Mrs. Hunt, of Oshawa, spent a few days at J. B. Gordon's.  
We regret to state that Chas. McNell is dangerously ill, with no hope of his recovery. Thomas Slocum is confined to the house with rheumatism.  
James Blach's children have the measles.

### NORTHPORT.

Nov. 15.—Mr. and Mrs. Fraser spent Sunday with Mr. and Mrs. P. H. Fox. Mrs. Saunders, of Napanee, has been visiting her son, James, during the week.  
Mrs. P. J. DeMille has returned to her home after spending a week in Napanee. We are glad to learn that Mr. Lazier is improving in health.  
Clayton Tripp, of Belleville, was in town on Monday.  
The neighbors were greatly frightened one day last week when the alarm was given that B. E. Craydell's house was on fire. There was a large crowd soon gathered only to see the burning out of a chimney.  
Mrs. P. H. Fox was visiting in Redversville one day last week.  
Clayton Tripp, of Belleville, spent last Saturday in Sarnia with his aunt.

### NAPANEE ROAD.

Cloudy weather had lots of rain just now, we are in want of sunshine.  
Farmers are very busy just now trying to finish their plowing this fall; there is considerable to do yet.  
Fall grain in this section is very backward for want of early rain.  
Will Brell has leased Mrs. Dollan's farm, North Fredericksburg, and they will move, Fall, we wish you success.

Mrs. Ed. McCall, who scalded her feet while doing her house work, is convalescent.  
John Conger, of the Sand Hill, a long time resident, passed away after a long illness.  
The barn on Mrs. Brown's lot at Liverpool is being rebuilt for a dwelling.  
Mrs. Todd has finished her barn.  
Another green house has been added to the Rathbun Company's farm.  
Robert Dowling has finished building his hog pen, and is now giving it a neat coat of paint.

### NAPANEE MILLS.

Nov. 16.—Since the rains farmers are making every effort to get their ploughing finished before the winter.  
There have been many cases of sickness and accident about this village during the summer.  
Mr. Hopper, who had his hand crushed in the grinding mill is at work again.  
Rev. Mr. Wagg, Methodist minister on Newburgh circuit, had a course of typhoid fever. As soon as he was convalescent he went to his home near Toronto. A few days ago he returned fully recovered.  
Charles Wild, who resides in the 2nd concession of Camden not far from this place, died on Wednesday Nov. 10th. He had been ailing all summer. About two weeks before his death he was taken suddenly worse; he sank until death ended his sufferings. He was about 61 years of age and leaves a wife and three children. The funeral took place on Friday at St. Jude's church, Napanee Mills, Rev. G. W. Swamy officiating. The remains were taken to Camden East for interment.

James Summerville and Mrs. A. Clement are no better. They have been ill a long time; both suffer very much.  
Mrs. Robert Ramsay has been visiting friends in Kingston.

Miss Gifford, of Brighton, was the guest of Mrs. Lott on Sunday last.  
Hugh, a young man returned from Warner, N. Y., where he has been since last July. He had the misfortune to get his foot crushed, as soon as he was able he started for home. It will be some time before it is entirely healed.

Joe Morgan, night watchman, had his leg injured some time ago (at Cement Works). He is not able to leave the house yet, he has worked in the employ of the Cement Company since the work started and is a steady honest fellow.

Mr. Jackson who had such a serious runaway some time ago, has quite recovered.  
Miss Latta McConnell is around again after an attack of fever.

John Morrison has purchased the Harrington farm from Robt. Pybus. Mr. Morrison will take possession in the spring.

### NORTHERN NEW YORK.

A foot of snow fell in the Adirondacks last week.  
Michael McCracken, of Malone, was shot by his wife and died next morning.  
A court of the Catholic Order of Foresters has been instituted at Ogdensburg.

A masked robber shot Asa Briggs, an agent at Hannawa Falls, and also his daughter. The old man may not recover. Morris Savage has been captured and put in jail as the person who committed the assault.

At Beaver River James Campbell was killed in Oudekirk's mill by falling on a buzz saw.

A vein of natural gas has been struck at Lansing.

The new school building on West Ozada street, Oswego will be completed by the close of the year.

Money to Loan at 5 percent. G. E. Deroche, Deseronto.

### OPEN LETTERS TO SECRETARIES AND DIRECTORS OF FARMERS' INSTITUTES IN ONTARIO.

Dear Sirs:—As a matter of economy of both time and money, I have this season made arrangements with the publishers of "Farming," 20 Bay St., Toronto, with the editors of the Daily and Weekly Mail and Empire, the Weekly Globe, and the Weekly Sun, to issue the annual Farmers' Institute Bulletin, which contains a complete list of the Regular and Supplementary meetings, together with the speakers' names, addresses, and subjects. Last week I sent each Secretary and officer a copy of each of these papers containing this Bulletin. I respectfully call your attention to the preface of the Bulletin published by each paper, which gives all necessary information and suggestions concerning the work for the year. Will you at once kindly notify each delegate sent to your Division what subjects you wish him to discuss at each of the various sessions held by our Institute.

As soon as your bills and programmes are published, kindly send a copy each to the Hon. J. M. Deary, Minister of Agriculture, Toronto, also to myself and each of the speakers on the programme. I respectfully urge you to select the subjects you wish the speakers to discuss and notify them immediately. This gives each of these speakers an opportunity to specially prepare the subjects you wish him to discuss. You will notice by the preface of the Bulletin that in several divisions the same kind of speakers. If a speaker is not billed to attend your meeting, do not advertise him or his subjects. Several Secretaries have serious mistakes in this way last year, though the utmost care was taken to inform them. Carefully read the preface before referred to and examine the list of subjects. If there is anything you do not understand, write me. I respectfully urge you to advertise and otherwise conduct your meetings and the business connected therewith as directed by the Act and Rules governing Farmers' Institutes, a copy of which you have. Please do all in your power to induce leading farmers in your district to take part in the programme. The more local talent you can employ, the more successful and helpful will your meeting be.

Yours very truly,  
F. W. HOBSON.

To Officers and Directors of Farmers' Institutes.

Dear Sirs:—The above is a copy of a letter which I have recently sent to your Secretary. Will you kindly forward the dates of the papers which published these lists: Mail and Empire, Oct. 30th; Farm and Fireside, Nov. 2nd; Globe, Nov. 3rd; Weekly Sun, Oct. 28th; Farming, Oct. 28th.

Yours very truly,  
F. W. HOBSON.

### SELF DENIAL WEEK.

The Salvation Army's annual week of prayer and self denial will take place in this territory from November 21st to November 27th. The self denial week and its purpose are well known to all. Many who have always been interested in its success and have appreciated the splendid results which have followed its institution. The army is itself rapidly advancing all over the world in spite of the many difficulties which have arisen. In this self denial week we are well known to all. Many who have always been interested in its success and have appreciated the splendid results which have followed its institution. The army is itself rapidly advancing all over the world in spite of the many difficulties which have arisen. In this self denial week we are well known to all. Many who have always been interested in its success and have appreciated the splendid results which have followed its institution. The army is itself rapidly advancing all over the world in spite of the many difficulties which have arisen. In this self denial week we are well known to all. PAIN-KILLER  
KILLS PAIN

## PAIN-KILLER

THE GREAT  
Family Medicine of the Age.

Taken Internally, It Cures  
Diarrhoea, Cramp, and Pain in the  
Stomach, Sore Throat, Stiff Colds,  
Coughs, etc., etc.

Used Externally, It Cures  
Cuts, Bruises, Burns, Scalds, Sprains,  
Toothache, Pain in the Face, Neuralgia,  
Rheumatism, Frosted Feet.

So widely are obtained for such unbounded popularity. It is a sure remedy for the efficacy of the Pain-Killer. We have seen its magic effect in soothing the most violent pains, and know it to be a good article—indeed, it is a household necessity. It has been used for generations, and its popularity is a sure sign of its efficacy. It is a sure remedy for the efficacy of the Pain-Killer. We have seen its magic effect in soothing the most violent pains, and know it to be a good article—indeed, it is a household necessity. ## ROCKS AND LEGHORNS.

Why They Are Among the Best of All Breeds of Poultry.

Mr. E. O. Roscoe, the well known poultry breeder, says in exchange that the breed nor excellence known from one end of the country to the other is the Barred Plymouth Rock. There is not a farmer, amateur or fancier who does not at once recognize the sterling qualities of this most popular of all breeds. It is almost useless to enumerate their qualities, they are so well known. Yet they live up to these qualities and maintain year after year the excellence which is the foundation of their popularity. For egg producers, when eggs are highest in price, they are reliable. For good, large bodied specimens, when meat is demanded, they seldom fail, and for hardiness and general health they have no superiors. They are not beautiful, except in the eyes of their admirers, yet there is a certain sturdy, businesslike air about these plain specimens which appeals to all classes and stamps them the great money makers of poultrydom.

It is safe to say that the demand for Plymouth Rocks is far in excess of that for any other breed. This does not reflect unfavorably on the other breeds. It simply shows that they are the public's favorites.

The very best quality any breed can have is hardiness. A vigorous constitution in fowls is the first thing to consider. With it we may expect a good growth, an early maturity, a good egg yield and a fine carcass; without it we cannot depend upon any of these results with certainty. The old and prime condition go hand in hand, and both mean the best results obtainable in poultry. The healthy hen is the egg type and the showman specimen. Condition should be the first consideration. Where one has found a healthier, stronger and more reliable breed than the Barred Plymouth Rocks? Climatic conditions do not affect them. They are bred in all sections of our country. They are alike indifferent

to cold or heat. No matter how low the temperature, this popular American breed attends strictly to business, and if they are comfortably housed at night and kept busy during the day we may look for a small nest box at gathering time. Still, they lay a brown egg, and if the demand should be for white eggs, or both white and brown, we must look for another breed to run side by side with them, in order that the demand for both may be supplied.

Among the business breeds which lay white eggs our choice is limited—we have the Leghorns, Minorcas and Andalusians. The Minorcas lay a large egg, and, if properly handled, plenty of them—but are they business egg machines? The Andalusians also are prolific layers, but if we breed them to perfection is the demand sufficient to justify their being kept for profit? We are forced to fall back on the Leghorns. Here we have truly egg machines. The choice of the entire family is probably the White, Brown or Buff. It matters little which we select, it is a fancy, admirers of each claim superiority. Are they popular? Yes—almost as much as the Plymouth Rocks. They are well distributed throughout the country. The public has adopted them, and the demand for them has been, is and always will be strong. Any person who cannot make money out of eggs and keeps White, Brown or Buff Leghorns does not deserve to be called an egg farmer. They are active, hardy, beautiful and profitable. Does any other breed combine more good qualities?

Their enemies, and they have some, call them spring and summer layers. They will lay as strong in the dead of winter as any other breed, if properly housed. Being a closely feathered variety, they need warm quarters. Keep them shut up all winter in a house where the water never freezes in the trough, and they will lay continuously, and when spring comes and the warmer air permits them to run out they will, like all other breeds, increase their egg yield, but in greater proportion. They are the fit mates for the Plymouth Rocks for egg production. Being a non-sitting variety, they continue the laying when the Plymouth Rocks become broody.

The great objection to the Leghorn is said to be its small carcass for market purposes. This is hardly an objection, except to those who demand size and weight alone. As the chicks grow very rapidly and are very active, they can be made to dress as fine a broiler as sweet, fine grained meat as any breed known and at the earliest broiler season. As roasters there is nothing better than a well fattened, three pound Leghorn cocker.

To conclude, therefore, we can consider that the great business team of all the breeds is the Plymouth Rock and the Leghorn.

## SELL EGGS AT HOME.

Farmers should never ship eggs until they have first endeavored to get better prices for them nearer home. If they would retail their eggs and seek customers, a large sum would be added to the receipts from poultry. Fresh eggs are always salable, and every family must at times have them. It frequently happens, when eggs are scarce, that one farmer must buy them from another. In every village and town will be found those who prefer to buy from the farmer than from the dealers.

## POULTRY FARMS.

Chicken Raising by Women Near Cities and Small Towns.

The raising of poultry is one of the most suitable occupations for women who live in small towns or in the country, and when properly and practically managed money can always be made. Chicks usually like to huddle about chickens, and the mother can nearly always count on her boys and girls taking an interest in the poultry farm, especially if it gives an outlet to have a few chickens of their own. The statistical bureau reveals an interesting and significant fact. The cash value of the cotton products of the United States for a certain year was given at \$410,000,000, the dairy products \$254,000,000, while the poultry products showed the robust sum of \$500,000,000. Surely this tells the value of the poultry farm.

The city and state of New York consume about \$48,000,000 worth of poultry and eggs every year, and the United States consume about \$100,000,000. England imports annually \$18,000,000 worth of eggs and fowls for domestic consumption.

"So it will be readily seen," says one of the women poultry raisers, "that poultry pays. It can be begun on a small plan, with ordinary barnyard fowls. As the stock increases and the business grows a higher grade of poultry should be bought and the best possible care should be taken of each feathered inmate of the barnyard. While a good breed of chickens is always desirable, the quality of the eggs depends chiefly upon the food of the fowls."

"White Minorcas and white Plymouths are both excellent varieties, and their eggs are delicious if the chickens are well fed."

"Give them meat and nitrogenous food. It is as necessary as the carbonaceous. Give them good wheat grains, not shivered, imperfect grains, but the best you can get. Cut up clean, wholesome meat and give them it, and let them have a good 'run' of ground, covered with clover and grass. Then there should be a plot of gravel, strewn with oyster shells and pounded bones. Chickens should have their drinking water in clean iron vessels. Let everything about the poultry yard be scrupulously clean, and the henhouses, roosts and nest shelves should receive the most careful attention."

"A pound of naphthalene crystals dissolved in a gallon of kerosene and applied as one would coal oil is recommended as a destroyer of lice and other vermin."

"Finely ground red pepper mixed with fresh meal dough is a good tonic for chickens during the winter and should be fed to them about once a month. Be sure that their winter quarters are warm and never forget to keep them as clean as possible."

Mrs. E. R. Sulley recently read a paper on "Women and Poultry" at Spirit Lake Institute, Iowa, which was published in full in The Farm News for August. Among other things she says:

"Keep your chickens warm, clean, busy and well fed. Have your chickens to kill in July and August, when the tourists are abroad, not in October and November, when the market is flooded. Have your hens lay in winter when eggs are high. You can do this if you will study them. Then your chickens will pay."

"Do not do as the farmer does. He allows his chickens to roost in the trees, lay, if they lay at all, where they can, steal their nests in summer, and raise their chickens in that way. The farmer comes in some morning and says, 'The chickens have been out feeding too long with two chickens.' The hens are gorged with corn one day and starved the next. To succeed in the chicken business you must study their wants and supply them. They need good care, and that means work."

## How to Kill Lice.

I have always been interested in poultry, and for 15 years I have kept a full flock of from 15 to 20 hens and 2 cockerels, the most of the hens now being full blooded buff Leghorns. From the two numbers of your paper I have received advice that would be cheap at \$5. One article alone on feeding too much will save more than 5 per cent in grain in a short time. I have been feeding three times daily all they would eat, and I have often wondered why they stood around so much. Living in a village, I kept them in, except spring and fall. One thing that has bothered me very much has been the wildness of the flock. They remind me of partridges somewhat. Since reducing their feed I find that they are not nearly so wild. I think even human beings are less independent when hungry. I have no bother with lice of any kind since I began using kerosene oil. I have a small tin spraying pump, one of the kind used in a pail for washing wagons, spraying fruit trees, etc. With a quart of two of plain kerosene, costing 5 or 6 cents, and the finest spraying nozzle I can put a thin or heavy film of oil over the whole inside of the house, and goodly lice. I use it once a week in summer. I think a thin whitewash could be applied in the same way, but I have not tried it. I think it is a good disinfectant.—Cor. Poultry Keeper.

## A Japanese Rooster.

The National museum at Washington has just received an example of the powers of the Japs in this mode of stock breeding which cannot be found anywhere else in this country. The fowl in question is a rooster. The rooster is probably one of the most interesting specimens from the ordinary barnyard chancier were it not for the enormous length of the tail. The tail is exactly 10 feet 6 inches in length and reaches to the great toe of the rooster. From the back of the rooster extend a dozen long filament feathers, any one of which would be long in the ordinary fowl, but three of the feathers are the great length. They are of a bright peacock blue and present a beautiful color, especially in the sunlight.

# SEE THAT THE FAC-SIMILE SIGNATURE OF

## SLOAN'S INDIAN TONIC

Cures Scrofula, Pimples, Ulcers, Abscesses, Boils, Blisters and all other disorders arising from impure blood.

More curative power in Sloan's Indian Tonic than in all other medicines combined.

Michael Dillon, of Richmond Hill, writes, "My wife bought a bottle of SLOAN'S INDIAN TONIC from your agent when she was here. She has been in very bad health for several years and has been treated by three different doctors, and has taken a number of different patent medicines, but she thinks one bottle of your medicine has done her more good than all the other medicines she has ever taken, and she wants you to send her another bottle of your medicine."

Price \$1.66 for \$5. All dealers or address

## Disconcerting.

"It may interest you, children," said the returned missionary, who was addressing the Sunday school, "if I tell you of an adventure I had once in India. While going through a jungle I came face to face with a lion. There was no chance to retreat, and I had nothing to defend myself with. I stood perfectly still and looked the fierce beast steadily in the eye."

"Which eye?" asked a breathless little boy in the infant class.—Chicago Tribune.

MARIANO GOMEZ, Commander-in-Chief of the Cuban Army of Liberation, declares against accepting any compromise from the Spanish Government. Independence alone will satisfy the insurgents.

The Pope informed Archbishop Bruchesi at an audience that he would shortly publish an encyclical to the Canadian episcopate vindicating the rights of Catholics in Manitoba to religious teaching.

Mr. David Gower, of Hamilton, has a claim against the Spanish Government for \$25,000 indemnity for the imprisonment of his son William in Cuba on October 8, 1895, by the Spanish war authorities.

In the face of threatened starvation and death in the Yukon region, the Portland Chamber of Commerce is prepared to supply food and clothing, and has asked the United States War Department to provide transportation.

The round-the-world missionaries of the W.C.T.U., who recently resigned on account of differing with the views of Lady Somerset on questions of morality, have indicated their intention of continuing their warfare against that lady.

The Ottawa local assembly of the W.C.T.U. has in hand the presentation of the woman's suffrage petition to the Government to enact prohibitory liquor laws. They are undecided whether to present the petition to Sir Wilfrid Laurier or Lord Aberdeen.

The St. Thomas City Council has decided to submit a by-law to the ratepayers on November 30 to guarantee the route of the street railway to the amount of \$50,000 and pay the first year's interest in consideration of the railway being electrified.

Mr. Justice Burdette gave judgment in the Exchequer Court confirming the report of the referee, which awarded twenty-one thousand dollars in the case of Henderson v. the Queen, arising out of timber supplied to the Curran bridge. The Dominion Government will have to pay the amount to Mr. Henderson.

## FROM PERSONAL EXPERIENCE.

Many have tried for years to discover a remedy suitable to their own case for the Constipation, Biliousness, Indigestion, Headache, Kidney and Liver Complaints arising from Poor Digestion, Weak Stomach, and Disordered Liver.

To these we say: Try the new medicine—

# Laxa-Liver PILLS

Read what people say. Here it is.

Mrs. E. L. Laver, of Montreal, N. B. says:

"They cured me of constipation and sick headache."

Mrs. H. JAMES, St. Nicholas Hotel, Hamilton, Ont., says: "They are a pleasant, sure and quick cure for constipation, dyspepsia and sick headache."

Miss M. E. HICKS, South Bay, Ont., says: "Laxa-Liver Pills are excellent for sick headache, causing no pain or griping."

Miss JANE TOWNSEND, Hamilton, Ont., says: "They are a perfect cure for even the severest headache."

# Merit

Is what gives Hood's Sarsaparilla its great popularity, its constantly increasing sales, and enables it to accomplish its wonderful and unequalled cures. The combination, proportion, and process used in preparing Hood's Sarsaparilla are unknown to other medicines, and make Hood's Sarsaparilla

## Peculiar to Itself

It cures a wide range of diseases because of its power as a blood purifier. It acts directly and positively upon the blood, and the blood reaches every nook and corner of the human system. Thus all the nerves, muscles, bones and tissues come under the beneficent influence of

# Hood's Sarsaparilla

The One True Blood Purifier. 50¢ per bottle. Pure Liver Bile; easy to operate. 20¢

## Thoroughly Grateful.

MR. STEPHEN BELISLE GLADLY TELLS HOW HE WAS CURED.

AFTER OTHER REMEDIES FAILED TO HELP HIM, DR. WILLIAMS' PINK PILLS MADE HIM A HEALTHY MAN.

Down on William street, the bulk of the business of the country trade is done and it is there that the Montreal cold storage and freezing company's mammoth building is located. In the summer months, when extensive shipments are being made, the big black is a veritable beehive. Several well known exporters put their warehouses in this building and one of them is Wm. T. Ware & Co. Their head house man is Mr. Stephen Belisle, who, as his name indicates, is a French-Canadian and in the prime of life. If ever there was a grateful man on the face of the earth to-day that man is Stephen Belisle. After suffering indescribable agonies for several months, he is now perfectly healthy and feels that it is his duty to tell all the world how he was restored to health and to his daily work.

My work called me to the front of the warehouse, and I felt that it was my duty to tell all the world how he was restored to health and to his daily work. I was suffering from a severe case of dyspepsia, and I felt that it was my duty to tell all the world how he was restored to health and to his daily work. I was suffering from a severe case of dyspepsia, and I felt that it was my duty to tell all the world how he was restored to health and to his daily work.

My work called me to the front of the warehouse, and I felt that it was my duty to tell all the world how he was restored to health and to his daily work. I was suffering from a severe case of dyspepsia, and I felt that it was my duty to tell all the world how he was restored to health and to his daily work. I was suffering from a severe case of dyspepsia, and I felt that it was my duty to tell all the world how he was restored to health and to his daily work.

It is reported that Newfoundland will be the right to be represented at the reciprocal conference between Canada and the United States on the ground of the treaty of 1890, which was disavowed at Canada's request.

Ex-Mayor Stewart, of Ottawa, who left Liverpool on Saturday for New York, announces that his business in connection with the completion of the Ottawa and Georgian Bay canal has been finished successfully.

Mr. C. W. Wynn, formerly of Tilsonburg, went shooting with a friend near Port Kowan. They separated, and Mr. Williams was found shortly afterwards lying dead in a few inches of water. An inquest will be held.

The Liberal candidate, Mr. Lavergne, was successful in election in Drummond and Arthursburg for the Dominion Parliament, his majority over Mr. Noel, the Conservative candidate, being 1,388, about 100 more than at the last election.

Mr. Stewart Pater, of North York, drew his money from the bank at Stouffville, and it is believed that he was shot and stabbed by a couple of highwaymen near Mount Albert, and where he ministered to and buried.

The Rev. Dr. Clarke, Presbyterian minister at Bracebridge, Ont., died there Thursday, aged 70. At one time he practiced medicine in Toronto, but he entered the ministry in 1885, his first and only charge being Bracebridge, where he ministered for over 20 years.

The mineral exports entered at the port of Nelson from the first of the year to October 16th, amount to 44,010 tons, valued at \$6,394,974. These exports are made up of copper matte from the Hall Mines and silver-lead ore from the Sloan and gold bullion from the Trail smelter.

The Dana estate, which is valued at a million dollars, is left almost in its entirety to Mr. Dana.

An opinion handed down in the United States Court of Appeals holds that a Washington despatch, says the publication of the Hawaiian Association treaty by the United States Senate is assured.

J. J. Daragh was sentenced at Kansas City for wrecking the Kansas City Safe Deposit and Savings Bank, of which he was president of the United States.

The first Scientist church in Chicago and the largest in the world of that denomination, was opened on Sunday. It has a seating capacity of two thousand.

Robert T. Lincoln was elected a director of the Pullman Car Company at Chicago. It is thought he will be elected president in place of the late George M. Pullman.

James J. Kelley, who has been on trial in Dover, N. H., for the murder of Cashier Vickrey, on the ground of self-defense, pleaded guilty to the charge of murder in the first degree.

Six hundred reindeer are to be collected from the Yukon Territory and herds in Alaska, to take part in the expedition to be sent to the eight whalers ice-bound in the Arctic.

The Brotherhood of Locomotive Engineers has purchased the Meadow Lawn farm in Illinois for \$17,450, on which a home for dependent engineers, their widows and orphans, is to be built.

It is stated that the reason Mr. Sovereign resigned from the office of Grand Master Workman of the Knights of the Ku Klux Klan, was that he might have free hands to run for President of the United States at the close of Mr. McKinley's term.

Durant, of San Francisco, the murderer of Blanche Lamont, who was convicted of the murder of her husband, was sentenced to death, has obtained a new lease of life, as under his recent appeal, he could not be executed before the second Monday in January.

At the meeting of the Knights of Labor, held in Louisville, Ky., Mr. James R. Sovereign, who has been General Master Workman for the past year, was, somewhat summarily, dismissed, and Mr. Henry A. Hicks, of New York, elected in his stead.

Frances E. Willard, president of the W.C.T.U., announces that she will contribute three thousand dollars of her own money to start the fund of three hundred thousand dollars which the temperance people need to hold control of the Temple property in Chicago.

FOREIGN.

Russia's efforts to control the Korean customs have caused a strong war feeling in Japan.

Official returns show that French imports and exports for the past ten months have increased.

With the exception of suffering from slight facial neuralgia, Prince Bismarck is enjoying good health.

Irrigation by artesian wells in the Bonanza district, New South Wales is proving a great success.

The eruption of Mount Vesuvius is increasing in activity, and the lava flow is threatening the adjacent towns.

The Lancashire cotton operators have consented to submit the question in dispute between themselves and the employers to arbitration.

Political changes are impending in Spain, and it is generally admitted that Mr. Weyler will play an important part in the struggle for power.

Thirty British army officers started last week from Liverpool for Lagos, on the west coast of Africa, and they are expected to leave this week.

The temperature, which was high last week in the United Kingdom, suddenly dropped on Friday, and snow has fallen in Scotland and the north of England.

## THE BLOODY RIDGE

RE-CAPTURED BY THE GORDON HIGHLANDERS.

Without Wavering They Rushed Into the Fire Zone—Officers and Men Alike Displayed the Greatest Bravery—Terrible Fled Precipitately Before Them.

London, Nov. 15.—The newspapers of the city have just received graphic details by mail of the recapture of Dargal ridge by the Gordon Highlanders on October 20, during which that regiment exhibited remarkable dash and courage. After the fighting on Monday, October 19, between the column of British troops under General Sir Herbert Murray and the enemy, the British troops, on the morning of the 20th, were ordered to dislodge the tribesmen. The position was a very strong one, the enemy occupying the summit of a precipitous hill that could be reached only by a single path, along which the attacking force, at first consisting of a Gordon Highlanders, the Dorsetshire regiment, and the Dorsetshire shire regiment, was obliged to climb in Indian file, while three batteries of artillery shelled the entrenchments of the hillmen.

Dargal ridge, from the direction of the assault, presents a frontal of about a mile, the left end of which is rock 200 yards. In spite of the difficulty of the ascent, the movements of the British troops were fairly well kept up, except in the case of a dip, or small valley, 100 to 150 yards wide, about half way up the ridge, and exposed to direct fire from the shelter of a few rocks. The British, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. But the others could not follow, and the enemy, with true military instinct, reserved their fire. Though the remainder of the Gordon Highlanders, the Dorsetshires, and the Dorsetshire shire regiment, were ordered to follow, the British troops, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. But the others could not follow, and the enemy, with true military instinct, reserved their fire. Though the remainder of the Gordon Highlanders, the Dorsetshires, and the Dorsetshire shire regiment, were ordered to follow, the British troops, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. But the others could not follow, and the enemy, with true military instinct, reserved their fire. Though the remainder of the Gordon Highlanders, the Dorsetshires, and the Dorsetshire shire regiment, were ordered to follow, the British troops, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. But the others could not follow, and the enemy, with true military instinct, reserved their fire. Though the remainder of the Gordon Highlanders, the Dorsetshires, and the Dorsetshire shire regiment, were ordered to follow, the British troops, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. But the others could not follow, and the enemy, with true military instinct, reserved their fire. Though the remainder of the Gordon Highlanders, the Dorsetshires, and the Dorsetshire shire regiment, were ordered to follow, the British troops, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. But the others could not follow, and the enemy, with true military instinct, reserved their fire. Though the remainder of the Gordon Highlanders, the Dorsetshires, and the Dorsetshire shire regiment, were ordered to follow, the British troops, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. But the others could not follow, and the enemy, with true military instinct, reserved their fire. Though the remainder of the Gordon Highlanders, the Dorsetshires, and the Dorsetshire shire regiment, were ordered to follow, the British troops, on the other hand, reserved their fire until their rifles were at the top of the cliffs burst into flame, for a thousand yards, the British troops, though decimated, the little mountaineers struggled across the dip and reached the plateau, where they were met by the officers they made a dash for the cover of the cliff side. ## TO DEATH.

Of death, of the fatal foe,  
The dread and blight of those below,  
Who only cherish pleasures known  
To those who live and breathe below.

To eyes of faith how changed that art  
That brings peace into the heart,  
While sin and death for aye depart,  
To those who live and breathe below.

Then, through bereavement, we our eyes  
Turn, for the first time, to the skies,  
To see a blessed and glorious light,  
Of unsullied death.

Then art of faith's far-reaching chain  
The weary chain that knits the gain  
Of heaven to earth's vain and pain,  
Of precious death.

Then art the dawn from that dark night  
That dost long painful friends unite,  
For death and trust thou givest sight,  
Of blessed death.

But, dearest to our hearts for this,  
Thou art the first to give the bliss  
Of seeing Christ, when here we miss,  
Of glorious death.

—Sophia Davis, Handmaid in New York Sun.

## IN THE GLASS.

It was May Waldergrave's sympathies to nature rather than her charms of face and figure that led Mark Carstone, the author of "A Trifling Affair," to bestow his friendship upon her. Carstone had sought long for a bright, intelligent, and amiable companion with whom he could discuss his work, and when he met May his search was at an end. She was tender and ardent and entered into his work with enthusiasm. She was elated at the honor vouchsafed her, and for a time the friendship ran on in the smoothest of grooves.

For a time. Of course it could not last forever. May was the first to realize this. Her face bore a rueful look as this fact forced itself upon her. Carstone's indifference to women's personal charms was proverbial. He was so absorbed in his own puppets that he had no time to devote to those who tried the human stage. In vain she wore her prettiest gowns—he never seemed to notice these things like other men.

And yet he wrote the most delightful love stories—wrote, too, as though he had sounded every note on love's lyre. As May finished his last book she felt that in spite of his seeming ignorance he knew more about a woman's heart than most men of her acquaintance. Tears of vexation stood in her blue eyes as she thought of her folly. Her girl friends one and all refused to believe that literature always formed the subject of those long discussions she held with him in the crowded corners and were beginning to "talk."

At Lady Barrowmore's reception she was sitting beneath a big palm discussing "A Trifling Affair" with its author. "So that girls of Mary's age called him old," she said, looking at him with a thin smile in the dark hair made him appear more.

"So you think it the best thing I have ever done?" he said.

"Yes, some of the critics say otherwise. Kirk, now, in The Scatifier, simply tears it to shreds."

She tossed her head in contempt. "Oh, Kirk! Why, he is 60, and, as every one knows, he is filled in his youth."

"What has that got to do with it?" he asked in surprise.

"Everything. You can't expect a woman to appreciate a love story."

"Only a girl could criticize such a book. I think it is perfect, and when I know that you have written it—well, I think it is wonderful."

"Why should I think that?"

"Because I had no idea you knew such a lot about girls—about love."

"I don't know much."

"You know everything. That girl in your story—Beatrice—is very lifelike."

"I am glad you like that," he said, his pale face flushing with pleasure.

"There is one part especially that seems to me so very true."

"Where that is thinking of her future lover, picturing the kind of man she would like."

## A WILY CLO' MAN

HOW HE STOPPED THE YOUNG MAN AND GOT A QUARTER.

Explaining a Few Secrets of the Trade, Why Some Well Dressed Men Are So Bold While Others Are Never Approached—Trading With the "Valley."

For a long time the young man had wondered why all the old clothes men in town had picked him out to be the other young man in the street and offered to buy his old clothes, hats, shoes and trunks and give him fabulous prices for them.

At first the offers had flattered him, and he had not minded the fact that the wily old clothes man to be noticed even as a humble person as an old clothes man, but as the offers became more frequent and the would-be buyers more insistent, doubt took the place of pride and he began to suspect that it might be something besides his immaculate make up that drew the merchants to him.

He noticed that, although they invariably made up their minds to buy and were ready to ignore other young men, they were quite as well if not a great deal better dressed than he was. This discovery worried him.

He had not time to ponder the matter, for the next one who tackled him he would find out just why he had been picked out. He had not tackled the other young man.

He found out. The man who prowls up and down Broadway in Twenty-third and Twenty-fourth streets all day after noon gave him the information. After he had finished the old stereotyped speech, "I beg pardon, sir, but have you any old clothes or hats to sell?" he asked the young man stopped him.

"I haven't any old clothes, or old hats, or old shoes, or old trunks, or old anything to sell, but if you'll come around the corner where we can be out of the way I'll just give you 25 cents to find out why you thought I had the goods to sell, and why all your gang always think so."

The young man flipped a quarter from one hand to the other as an evidence of good faith, and the old clothes broker, wondering, but fierce for the quarter, followed him.

He demanded the young man, when they had turned down Twenty-fifth street, "Why is it that you struck me for old clothes and let that gentleman just stroll by with a load of goods?"

"He was as well dressed, wasn't he?" "I get the quarter, do I, whether I hurt your feelings or not," asked the merchant.

"Well, sir," said the broker confidently, "the reason I didn't ask that other gentleman was because he was better dressed than you. He don't look no never you understand me," he added quickly.

"But you see his clothes cost more when he bought 'em. They cost more when he bought 'em and cost him probably \$50. We'll get 'em all right in time, but not from him."

"You're right," said the young man, and they went on. "He was better dressed and they didn't cost you no \$50 when you bought them, and yet they didn't come from him."

"Now, we have to be good judges of human nature in this business. We have to be able to pick out that crowd on Broadway who are sure to give you a good price. We take the men who we think have to study and worry around before they can get a suit made."

"Maybe they're thinking how they can get hold of a couple of dollars when we ask them. If they are, then we get 'em."

"You got it, didn't you? He had a block before they think what I was saying. Then it occurs to 'em, and they walk back and say, 'You come around to So-and-so's. Maybe I've got an old suit you can have.'"

"Time and again I've had that happen, and let me tell you I don't do the whole thing without going to let me have without working for it. They have an idea I'm going to give them a few dollars less than they are worth."

"You got it, didn't you? In these days of arguments made to order for \$5 or \$10 they ain't no money in this business for us."

"You're right, but we ain't no money in this business for us, and we had a walk a block and come back, did you?"

"Maybe I never did, but we all has to take a walk. Now you look as if you might come back. Not that I was wondering about where to get \$5 or \$10, but you have that kind of appearance."

"What kind of an appearance is that?"

"Well, I replied the broker, "while you look plenty all right, you don't study and thinking about it. You trousers look as if you might have creased them yourself, and your shirt looks like a cheap one. You ain't one of them 40 cents either, and your shoes have been patched and you put flaking over 'em to hide the patch. Ain't I right?"

"The young man admitted that he was a little out of clothes and that he was going to do that."

"Through his servant. That's where you get your clothes. How are you going to do that?"

## Ayer's Sarsaparilla

"Some years ago, as a result of too close attention to business, my health failed. I became weak, nervous, was unable to look after my interests, and manifested all the symptoms of a decline. I took three bottles of Ayer's Sarsaparilla, began to improve at once,

and gradually increased my weight from one hundred and fifty to two hundred pounds. Since then, I and my family have used this medicine when needed, and we are all in the best of health, a fact which we attribute to Ayer's Sarsaparilla. I believe my children would have been fatherless to-day had it not been for Ayer's Sarsaparilla, which preparation I cannot say too much."—H. O. HISSON, Postmaster and Planter, Kinard's, S. C.

AYER'S PILLS SAVE DOCTORS' BILLS.

Composing Scotch Dialect Stories. One of the Scotch of the Scotch dialect story writers confesses in an article, interview, which he himself contributes to a periodical, that he thinks and plans to "often keep a story for months and years in his head without writing a single word." When the actual writing begins he "works rapidly." The condition of his mind is such that he is revolving in it "for months or years" not here is considered. The astonishing thing is what a friend of the Scotchman in question tells in addition: "Work rapidly" he says. "I should think he does. He has two typewriting machines of his own, and he has a good one, especially for his own use, at a cost of \$200 each, and he works on these at lightning pace. But that is not all—he will carry a book of his own composition in his pocket, and he is writing out a story on the machine. Now, I have heard composers talk while sitting type, but they are not writing. He is writing. He is writing out original material. Usually he works alone, beginning at about 3 o'clock in the morning, and when he comes down to breakfast he has 900 words written out. I never saw such a man. He seems to be inexhaustible and is certainly indefatigable. He is a foot tall, weighs 220 pounds and is as nimble as a cat." Thanks be to the gods it is only "commercial fiction" which is turned out at a prodigious rate. How terrible indeed to think of a man being forced to order two extra strong typewriters to carry his light weight in type!—Boston Transcript.

Gautier, the Amateur Artist. Like Thackeray, Victor Hugo and some other famous writers, Theophile Gautier began his life with the determination to devote himself to literature. But he was a student who wore his famous red waistcoat and attended the theaters in order to applaud Victor Hugo. Later in life the main theme of his writing was the portrait of the drawing face heads of his heroines, and he possessed the ability to portray varied types of character no less than the crayon with the pen. Engravings from several of his sketches were used as frontispieces or vignettes on the title pages of his books.

It is as a painter in words that Gautier will longest be remembered. In fact, he may be said to have created that style of writing which is so characteristic of the French. He would never have been able to produce the delightful word paintings in travel, the Western Canada, the West Indies, and other stories and his books of travel if he had not practiced with crayon and brush and learned the language of the studios.—Art Amateur.

Fuming For Revenge. "I want," said the determined looking young man, "900 of the strongest cigars I can get hold of."

"What for?"

"The girl I gave up smoking for has gone back on me."—Philadelphia North American.

My Easy Language. "Johnny, do you know where those pills are that you told me to take?" "Yes, yes, I took them."

"You took them. What do you mean? How many did you take?" "I gave them to sister to take, but nurse took them away from her so she didn't take any."—Brooklyn Life.

In the old days, when fur was used in the manufacture of "rope pipe" hats, the American beaver was one of the most important of all mammals in the fur trade, but this manufacture has almost ceased.

Miss Anna A. Howe, of Eden, Ont., says that she suffered from Catarrh of the Throat for several years. She had tried all sorts of remedies, but was always disappointed in the result.

Later she suffered intense pain in her head and her throat was lined with sores. The doctors called it Catarrh of the Throat, but did not cure it. She saw Dr. Chase's Catarrh Cure was being highly recommended, so procured a box from C. Thomson, and commenced its use. Soon the ulcers cleared away from her throat, and she was able to swallow without pain, and is the most effective catarrh remedy she ever tried.

Mr. J. D. Phillips, a Justice of the Peace, declares that he knows Miss Howe and her husband, and that she is the most truthful of her statements.

Dr. Chase's Catarrh Cure, sold by all druggists.

## FRUIT AND FLOWER

### FRUIT STORAGE CELLAR.

A System That Protects Against Freezing and Gives Perfect Ventilation.

The building can be made any size or form desired, provided you secure protection against freezing and perfect ventilation. In localities where the winter temperature is apt to fall to 35 degrees below zero such a building must be very carefully constructed. A New York correspondent of American Gardening thinks that the following plans would answer the purpose:

The foundation should be of stone, 2 feet thick. Set 2 by 4 joists, 10 feet high for one story, 2 feet apart upon the foundation walls. Line up each side of the joists with good matched boards and paper the same with building paper. This will leave an air chamber 4 inches wide in the center of the wall. On each side of this nail 2 by 6 plank and cover it with siding on the outside, but with matched boards on the inside, filling the 6 inch space with sawdust slightly packed. For the roof use 2 by 10 plank ceiled on both sides and the space filled with sawdust. The outside of the roof must be covered with waterproof roofing. There should be two doors, one to open inward and the other outward,

WALL OF FRUIT STORAGE CELLAR.

and they must be made thick so that the resistance to heat or cold will be about the same here as on the sides and ends. If windows are used, four casings, about 2 or 3 inches apart and closely fitted, will be required.

Now for ventilation. If the floor is high, so that water will not stay on it, I would leave a hole under the wall within a foot of the corner at each end. Build it up one foot above ground and cover it securely in such a manner as to be easy of access to open or close, as necessity may require. Then in the center of the roof leave a hole, say 12 inches square, protected as you would the ventilator in an icehouse. The hole can be fitted with a door, either to swing or slide. This system will give perfect ventilation. Unless the temperature inside should be above 35 degrees the outside ventilators should not be open. This plan will answer well in summer or winter. Any carpenter ought to be able to get a good idea of the building from this description.

### Wintering Chrysanthemums.

Mr. T. D. Hatfield, a high authority on this subject, observes in the transactions of the Massachusetts Horticultural society that when it is remembered that pompadour varieties are quite hardy in Massachusetts and many others hardly so it will be seen that no pampering is necessary in wintering the plants over. Such as have been grown in pots are by the nature of their previous culture too tender to be turned out at once. A very cool cellar, such as a barn cellar, on a shelf near the light, would be a good place to keep them. A little frost inside should not harm them. It is better to keep the plants cool, for if the place is at all warm they start into growth, and this weakens them. They freeze sometimes, but come out all right in spring.

### The Small Fruits.

After pruning the roots of plants should be buried back into vigorous life by cutting out all old and surplus growth, cultivating thoroughly and giving a good dressing of fine manure or wood ashes. This best prepares them for resisting the cold winters of the north and stimulates them for active work in the early springs of the south, writes a well known horticulturist in Gardening.

### Brief Mention.

Experiments are being conducted in Poughkeepsie, N. Y., in the extermination of insects by fumigating greenhouses with hydrocyanic acid gas, one of the deadliest of poisons. It is said that it kills all the insects, but does not injure the plants.

Italia, Austria and Burbank are vigorous and beautiful cannas.

Many of the streets of Paris are lined with trees. If a tree dies, another of the same kind, age and size is brought from the state forests and put in its place. The cost is tremendous, but Paris is the most beautiful of modern cities.

No use in trying to grow peaches and other crops on the same ground the same year. It won't work.

Vick says that freshias and lachenalia are a good investment. They can be forced year after year without diminishing their flowers.

The monkey puzzle is a popular name given to the Chile pine. It is a handsome evergreen, with deep green, stiff, pointed leaves, that closely overlap one another like the shingles of a roof.

Soot from the kitchen chimney, especially from a wood fire, is invaluable in the cultivation of flowers.

The stock has no influence over the fruit of the graft, says T. S. Gold.

## FRUIT AND FLOWER

### BULB CULTURE.

Autumn Work Out of Doors—Covering the Bulb Bed.

If we would meet the early snow-drops and crocuses, the gaily tulip and the primly hyacinth, with their companions, in the garden in the spring, we must become fall planters. Because autumn does not to many seem the right time for garden making, no doubt many lawns and flower gardens are without these most charming flowers that otherwise would have them. There is no good excuse for this. It is just as easy to make up a bulb bed from early until September or October as it is in the spring, according to Vick's Magazine, from which the following is gleaned: The great value of the hardy bulbs in extending the season of bloom in the garden makes it inexcusable not to have them in abundance. Without this class the lawn and flower beds are bare of bloom for several months in the spring, before they are occupied with the regular summer flowers. It means one crop of bloom in the season when with autumn planting the same beds could have succeeding crops from early until late. Nor must we overlook the fact that of all our garden flowers the sweet, beautiful Dutch bulbs, coming in the lovely springtime when nature draws us to the garden, excel all others in delightful qualities.

It is not in the garden alone the advantage of this class of bulbs most strongly appears. Inasmuch as the season of bloom for several very hardy bulbs is sufficient to start the growth sets in they are matchless among flowers suited to home culture in winter. Whoever can succeed in growing any kind of house plants may find no hesitation undertake the culture of hardy bulbs in the window, for the culture of no others is easier. With the hardy bulbs at our command there is no excuse for not having an abundance of the most delightful flowers in our homes during the winter and spring.

Be sure to give the spring blooming bulbs a nice warm winter blanket of leaves, litter from the stable or brush or a combination of all, and do not be in a hurry in spring to get them out of their winter clothes. Don't rush out the first warm day and clear away all the brush and litter just because it is unsightly looking. The crocus and snow-drops will not need so warm a covering as the other bulbs and can be uncovered earlier in the spring. But from the tulips, hyacinths, etc., gradually remove the covering, leaving the finest of the stable litter on the beds permanently.

### The Most Costly Fruits.

As estimated in the New York Sun, hot-house grapes are the costliest of fruits. "They are never less than 75 cents a pound, and when they are most costly, in February and March, they sell for \$1.00 a pound, sometimes going as high as \$1.50 a pound. At prices ranging up to \$2 a pound there is a ready sale for them. At the higher prices they are sold almost exclusively for the use of invalids. There is a sale for all that are produced, but the production at the season of highest prices is small. The cost of production is great, and the vines may die from exhaustion after a single season of forcing."

"The next most costly fruit is the hot-house peach. Hot-house peaches sell in February at \$2.50 each. They are used mainly by invalids, but such peaches are also often sold for gifts. They are presented as flowers, or as bonuses would be. Three or four peaches are packed in cotton and set off with a few peach leaves in a handsome box. Hot-house peaches run down to about 60 cents each in April and May, when we begin to get the first of the peaches from the south."

### Growing Violets.

Violets are so easy to grow that it is surprising they are not in every garden. They are not injured by frosts, but the severe frost has to be kept from them to get them to bloom all winter long. A little two-light cold frame will secure this effectually. If made tight and strong they will do good service for many years. The frame may be put in to shape and the violets planted in September.

COLD FRAME WITH VIOLETS.

tember or October, and the plants will be in flower by Christmas and keep it up until far into spring. One of the troubles is to get the sash and frames properly made. But these can now be procured ready made and shipped at a small cost. To show what good fruit should be Mehan in his Monthly calls attention to an illustration from Lord & Burnham's catalogue of a cold frame, with sash placed in position and the plants set in the earth beneath.

There are few enemies of the violet, a fortunate circumstance for growers.

### The Crimson Velvet Plant.

It is in American Gardening that an everyday name has been found for one of the newer offerings, Gymna ananthis. This name is "crimson velvet plant." It is described as a grand and very beautiful plant, that has a very rich surface plot of beautiful magenta crimson color on the young growth. The plant is of good shape, compact and apparently very lustrous and robust for one with highly colored foliage. Altogether it is most attractive and blue fair to become popular with window gardeners when its merits are better known.

The Sloan Medicine Co.,

Forest, Ont., Oct. 12th, 1897.

Dear Sirs:—About two years ago I suffered from an attack of bilious diarrhoea which became chronic and threatened my existence. I used several kinds of patent medicines and was treated by my family physicians but was not cured until I used your Sloan's Indian Tonic. It helped me at once and I continued to improve and now enjoy perfect health. I can heartily recommend it to all troubled as I was, or in need of a general invigorating medicine.

R. R. DICKEY, J. P.

HERE IS THE NEWS IN SHORT ORDER.

Findings from all Parts of the Globe, Condensed and Arranged for Busy Readers.

## CANADIAN.

Wallaceburg is to have a free library.

Brantford is to have a new \$50,000 opera house.

The Galt brass band is going into amateur opera.

Several stores in Hepworth are lighted with acetylene gas.

The estimated cost of the Roseland mining plants in \$33,000.

A vein of virgin gold is reported to have been discovered in Alberni.

Four applications for divorce will come before the Senate next session.

Windsor is enjoying good health, according to Health Officer Lambert.

The Windsor Curling Rink Company will erect a rink at a cost of \$3,500.

The Hopworth oil well is down 350 feet, but there is no sign of oil yet.

The Kintore branch of the Farmers' Institute has been re-organized for the ensuing term.

The shipments of ore from Roseland this year have reached the neighborhood of 70,000 tons.

All the factories in Guelph are now having several establishments are running overtime.

Even burglars have a fair show in Teeswater. The night watchman goes off duty at 2.30 a.m.

Mr. Arthur Gray and his wife, who has received the appointment of County Treasurer of Simcoe.

The Dominion Bank statement for October shows a remarkable jump in the circulation of the bank.

Schomberg ratepayers have decided on building an addition to the school house and engage a third teacher.

Several Blenheim people are already making preparations for an early start for the Klondike next season.

Frontenac County will not get more than \$8,000 of the \$31,000 delinquency of County Treasurer Yanverson.

Mrs. Cavithra-Murray and Mrs. David Smart, two well-known Toronto ladies, passed away Saturday morning.

Since the obstructions were removed from the Elburgh gas line the work is being pushed with all promptness.

Three carloads of ore shipped from the Reo mine in September are said to have produced a net profit of \$18,269.50.

The announcement is made that the C.P.R. will establish Customs smelters all along its route through Kootenay.

The grading on the Crow's Nest Pass railway is completed. Crow's Nest Lake, 72 miles distant from the terminus.

A Brantford hotel cook tried to start a fire with gasoline. Result—a big scare and more than enough fire for breakfast.

The McNaughton-Walker Company, of Chatham, on Tuesday last shipped 300 cases of 6,000 dozen of eggs to Liverpool.

Miss Annie Craig, of Chesley, is suing Charles W. Gilm, of that place, for \$5,000 damages for breach of promise of marriage.

The new U. S. Consul at Stratford, A. G. Seyfer, has arrived in that city. The retiring Consul, Mr. Shafter, will remain a few weeks.

The Essex Electric Light and Power Company's new machinery has been set in motion. The plant is one of the finest in Ontario.

Thomas White, who had lived alone for a number of years on a farm about a mile from Comber, was found dead in bed.

The Canadian Pacific railway is now arranging for a series of special excursions to the Klondike for the coming spring.

The vote on the repeal of the Local Option law at Pickering, Ont., resulted in favor of repeal by a majority of twelve.

The tunnels and drifts of the War Eagle mine at Roseland are a mile in length, and its total workings aggregate 5,000 feet.

Thomas Davidson, messenger in the Bank of Hochelaga at Winnipeg, committed suicide by shooting in the rooms over the bank.

Reports received by the Marine and Fisheries Department indicate the total failure of the fall mackerel fishing on the Atlantic coast.

Alex. McQuinn, the engineer charged with manslaughter as a result of the C.P.R. accident at Stittville, has been committed for trial.

Deputy Returning Officer Saunders has been fined \$200 or three months in jail for ballot-box stuffing in the Macdonald, Man., election.

Justice McCreight has resigned his position as judge of the Supreme Court of British Columbia. He has been on the bench for eighteen years.

The mineral output of British Columbia jumped from \$2,408,698 to \$7,146,425 in six years. And the country can hardly be said to have started yet.

Several wild cats have been shot in the vicinity of Petrolia during the last week. There appears to be an unusual number of the beasts in the woods.

The Roseland Miner estimates that 100,000 tons of ore, at a value of \$98,272,870, have been hauled out of Kootenay in the last six years.

Rev. Mr. Silcox, of Paris, is one of the old "vets" entitled to a Government medal. He was sergeant-major of the St. Thomas Troop of cavalry in 1866.

Mr. O. A. Howland, M.P.P., has announced his willingness to become the Conservative candidate in Centre Toronto at the approaching Dominion bye-election.

Farmers' Institute meetings will be held at Essex on January 29; Brantford, January 31; Crediton, February 21; Zurich, February 22; Hensall, February 23.

A meeting of the Grangers at Middlemarch discussed the question of "Farmers' markets." Disaffection was expressed over the methods of packers and middlemen generally.

A party of four Englishmen, under the command of Captain E. H. Bernard, of the Indian Staff Corps, a nephew of the Baroness Macdonald, left Montreal Friday night for the Klondike.

A party composed of members of the Boards of Trade, Health and Works of London, thoroughly inspected the London sewers and came to the opinion that the system was very complete.

Mr. W. A. Grenier, who was sentenced to six months' imprisonment for libelling Mr. Tupper, was released Friday afternoon, having served one month of his sentence.

Sir Oliver Mowat was sworn in as Lieutenant-Governor of Ontario, and Mr. David Mills as Minister of Justice on Thursday. The ceremony was performed by His Excellency the Governor-General.

The arrangement for the extension of the Intercolonial railway into Montreal over the lines of the Drummond, Grand Trunk and Montreal, which the Government is expected to commence the first of December.

The Chateau de Rameray, Montreal, has obtained a valuable addition to its collection in a portrait of Gen. Wolfe, by Constable Alston, the only painting of that extent that was executed during the general's lifetime.

The Director of the Christian Brothers in Montreal has given instructions that the members of the order are not to teach night schools in Hull, as he considers they are already working too hard in attending to their day duties.

The Governor-General assented to the Order-in-Council appointing Senator McIntyre, Lieutenant-Governor of British Columbia and Mr. William Templeton, Senator. The Department of the Interior has received a report from Major Walsh, Captain of the 10th Cavalry, that he has got all his supplies over the pass and is now on his way to Selkirk.

Major-General Gascoigne held an investigation in Montreal into the dispute existing in the commissioned ranks of the Royal Scots of Canada. The Commander-in-Chief censured Lt.-Col. Strath, a doctor, for his conduct, and said if the blooding did not cause him to dismiss both officers and disband the corps.

The Leather Belting Manufacturers' Association of the United States decided at New York on a general advance of 25 per cent. on the price of belting.

It is reported at Washington that the German Minister failed to notify the Chinese Foreign Office of the intention to land German troops at Kiao Chau Island.

It is said that President McKinley has prepared an Anglo-American arbitration treaty, which, while not going as far as he would wish, goes as far as he thinks the Senate will stand.

Fred H. Ketchum, of Chicago, was given a judgment of \$22,666 in his suit there against the Northwestern Railroad for \$25,000 damages. He was blacklisted as a contractor for the railroad.

"Satin's Invisible World Displayed, or Despairing Democracy," is the sensational title of a sensational book, dealing with the Greater New York, which Mr. Stead, the editor of the Review of Reviews, will give to the public next month.

According to the commercial agency reports from Messrs. Dunn and Bradstreet, New York, the general trade conditions show no marked variation. In some lines there is a moderate improvement in demand, as cooler weather in some directions has helped retail trade to a noticeable extent. Better prices have prevailed in wheat, oats, corn, hides and leather, syrup, turpentine, etc. The consumption of iron and steel is increasing so rapidly that an advance in prices is probable. Railway earnings for the third quarter of the year lead us to anticipate fairly satisfactory net returns. The reports of a large proportion of the railway companies in the United States point to a more satisfactory general result. We have at intervals from the United States for the week just ended amount to 235, as compared with 208 in the corresponding week a year ago.

The rebellion in Northern China is spreading.

Paris, France, was visited by a destructive fire.

Mr. Gladstone is reported to be growing very feeble.

Under pressure from Russia, Turkey has abandoned her idea of increasing her armament.

About three hundred firms which were burned out by the London fire are seeking for new offices.

In addition to the reports of chess factories that have been made late last winter butter-making plants are now being put into no less than eleven factories.

The butter factories will be running as winter creameries, in addition to the central creamery in Charlottetown, and one in St. John's.

It is announced from St. Petersburg that the Zarina may present an heir to her husband before long.

## Broken Chain

The family circle is never so happy after the chain is broken and a link taken. Some family chains are strong.

Others are weak. If you have a good family history? Or is there a tendency to coughs, throat or bronchial troubles, weak lungs? Has a brother, sister, parent or near relative had consumption? Then your family chain is weak.

Remember, Take SCOTT'S EMULSION OF Cod-liver Oil with Hypophosphites. It makes rich blood, gives strength and vigor to weak lungs and run-down constitutions. With its aid the system throws off acute coughs and colds. It prevents the chain from breaking.

Shall we send you a book about this, free?

## FROM THE CAPITAL.

GENERAL GASCOIGNE AND COL. STRATHY'S CRITICISM.

False Reports of the Chilkoot Trail—Cigar Manufacturers' Deputation—Prince Edward Island Burying.

Ottawa, Nov. 23.—It is not believed here in official circles that Gen. Gascoigne will attempt to discipline Col. Strathly, commanding officer of the 4th Royal Scots, Montreal, for the press interview in which the General is taken severely to task. It is contended that after reprimanding the Colonel and his Major, Gen. Gascoigne used the press to advertise this fact and to comment on it so as to humiliate them before the public.

The General is now in the city, and is expected to leave for the front on Saturday. He is not to attempt to pre-empt the press, but to let the public hear of his opinions, and rule 966, which prohibits "the publication through the press of any statement of anything calculated to cast injuriously on the service."

Col. Strathly violated these regulations only after the General himself had set the example, and for this reason, it is thought the matter will not be further stirred up by the General, though the Minister of Militia, who is now at Camp, N.S., may deem it his own duty to take up the matter. Col. Strathly is an honorary A.D.C. to His Excellency the Governor-General.

The San Francisco press despatch, dated November 1, reporting twenty deaths on the Chilkoot Trail, is like most of the reports of the Klondike, a very much exaggerated statement. The information purports to rest on a letter dated at Skagway, October 25, the very date that Major Walsh and party found no difficulty in getting over the trail.

A gentleman who passed through the Sheep Camp on October 25, and came with a correspondent on Friday and is able to contradict the story. Most of the blood-letting has been done on the Pass must be written by those who were never there. It is tiresome travel to a tenderfoot, but neither dangerous nor difficult. It is described by packers as a fair mountain trail, and up to November 1 presented no great obstacles to men accustomed to outdoor travel.

Since the trail has been only one death on the Chilkoot Trail, or less than occurs on the main street of a city. Of course the trail is not a highway, but on this side of the summit is a very mild affair, the sudden snowstorms forming the chief objection. Several colds are reported to have been contracted.

Rev. Joseph Lofthouse and Mrs. Lofthouse are in the city. Mr. Lofthouse has been stationed at Churchill, about six miles from the mouth of the river, for nine years. In an interview to-day Mr. Lofthouse said: "We left Churchill on the 10th of October, and arrived at Hudson Bay and up the river for three weeks in a canoe, camping at night on the banks of the river."

**BLANCO'S CUBAN POLICY.**

HAVANA, Nov. 22.—It is stated on very good authority that General Pando has been commissioned by Marshall Blanco, after a consultation with the Captain General, first brought about the close of confinement of Damian Caballero, who had been imprisoned on the Isle of Pines for some time past. General Pando instructed Caballero to offer General Rabi, the well known insurgent leader, a high rank in the Spanish army, and a large sum of money to be distributed among the other insurgent leaders in Cuba and in addition, a large amount of money for himself in the event of his capture. General Pando is anxious to establish the new autonomous regime of the leaders of the insurgents would accept the propositions made to them.

**GEORGIAN BAY CANAL.**

**Mr. McLeod's Success in London—Its Completion Assured.**

Montreal, Nov. 23.—Mr. McLeod Stewart, of Ottawa, who went to England to interest the Imperial Government and English financiers in the Montreal, Ottawa and Georgian Bay canal was returned. Mr. Stewart states that he has successfully approached one of the most eminent, if not the most eminent, firms of financiers in the United Kingdom, and had made all arrangements for the capital required, and for the construction of the canal. The work of construction is now being pushed with the greatest energy. The canal work is to be completed in three years, at the most. Another interesting feature is that Sir Benjamin Baker, one of the greatest engineers of the day, his connection with the work will ensure its being carried out in a style worthy of such a great imperial, military and commercial undertaking.

Ottawa, Ont. Nov. 22.—Mr. McLeod Stewart, of Ottawa, who went to England to interest the Imperial Government and English financiers in the Montreal, Ottawa and Georgian Bay canal, has returned from England, and states that the success of the enterprise is assured. He has secured the necessary capital, and has been made in the canal negotiations," he says. "The canal will be built, built with Canadian labor, and manufactured in Canada. The canal has been taken up in England with an enthusiasm which could scarcely have been anticipated."

**A Fatal Jump.**

Morrisburg, Ont., Nov. 22.—Mr. John Frosts, a respected resident of this town, who was employed by the Government work between Iroquois and Cardinal, met with a fatal accident here Saturday night. In company with his brother-in-law, a fellow worker, he boarded a freight train at Iroquois, intending to come to Morrisburg to spend Sunday. On arriving at this station the train slowed up somewhat, and they jumped. The younger Frosts and his companion alighted safely, but John Frosts, striking his head with such force against the rail as to fracture his skull badly, rendering him unconscious, in which state he remained all night, expiring at night. Besides his aged parents, the deceased leaves a widow and one child, only three days old, to mourn his untimely death. Much sympathy is expressed for the family in their sad affliction.

**ITCHING PILLS.**

Some time ago I was completely incapacitated for business by a case of itching piles. I bought a box of CHASE'S OINTMENT and it was relieved at once. I have since used it on my brother and it has been relieved. It is a cure for itching piles. WM. LITTLE, Caldwell, Ont.
